CHAPTER 48

PAPER AND PAPERBOARD; ARTICLES OF PAPER PULP,
OF PAPER OR OF PAPERBOARD

Notes

1. For the purposes of this chapter, except where the context otherwise requires, a reference to “paper” includes references to paperboard (irrespective of thickness or weight per m^2).

2. This chapter does not cover:

   (a) Articles of chapter 30;

   (b) Stamping foils of heading 3212;

   (c) Perfumed papers or papers impregnated or coated with cosmetics (chapter 33);

   (n) Metal foil backed with paper or paperboard (generally section XIV or XV);

   (o) Articles of heading 9209;

   (p) Articles of chapter 95 (for example, toys, games, sports requisites); or

   (q) Articles of chapter 96 (for example, buttons, sanitary towels (pads) and tampons, napkins (diapers) and napkin liners for babies).

3. Subject to the provisions of note 7, headings 4801 to 4805 include paper and paperboard which have been subjected to calendering, super-calendering, glazing or similar finishing, false water-marking or surface sizing, and also paper, paperboard, cellulose wadding and webs of cellulose fibers, colored or marbled throughout the mass by any method. Except where heading 4803 otherwise requires, these headings do not apply to paper, paperboard, cellulose wadding or webs of cellulose fibers which have been otherwise processed.

4. In this chapter, the expression "newsprint" means uncoated paper of a kind used for the printing of newspapers, of which not less than 50 percent by weight of the total fiber content consists of wood fibers obtained by a mechanical or chemi-mechanical process, unsized or very lightly sized, having a surface roughness Parker Print Surf (1 MPa) on each side exceeding 2.5 micrometers (microns), weighing not less than 40 g/m^2 and not more than 65 g/m^2.

5. For the purposes of heading 4802, the expressions "paper and paperboard, of a kind used for writing, printing or other graphic purposes" and "nonperforated punch-cards and punch tape paper" mean paper and paperboard made mainly from bleached pulp or from pulp obtained by a mechanical or chemi-mechanical process and satisfying any of the following criteria:

   For paper or paperboard weighing not more than 150 g/m^2:

   (a) Containing 10 percent or more of fibers obtained by a mechanical or chemi-mechanical process, and

      1. weighing not more than 80 g/m^2, or

      2. colored throughout the mass; or

   (b) Containing more than 8 percent ash, and

      1. weighing not more than 80 g/m^2, or

      2. colored throughout the mass; or

   (c) Containing more than 3 percent ash and having a brightness of 60 percent or more; or

   (d) Containing more than 3 percent but not more than 8 percent ash, having a brightness less than 60 percent and a burst index equal to or less than 2.5 kPa•m^2/g; or

   (e) Containing 3 percent ash or less, having a brightness of 60 percent or more and a burst index equal to or less than 2.5 kPa•m^2/g.

   For paper or paperboard weighing more than 150 g/m^2:

   (a) Colored throughout the mass; or

   (b) Having a brightness of 60 percent or more, and

      1. a caliper of 225 micrometers (microns) or less, or

      2. a caliper of more than 225 micrometers but not more than 508 micrometers (microns) and an ash content of more than 3 percent; or

   (c) Having a brightness of less than 60 percent, a caliper of 254 micrometers (microns) or less and an ash content of more than 8 percent.

   Heading 4802 does not, however, cover filter paper or paperboard (including teabag paper) or felt paper or paperboard.

6. In this chapter "kraft paper and paperboard" means paper and paperboard of which not less than 80 percent by weight of the total fiber content consists of fibers obtained by the chemical sulfate or soda processes.

7. Except where the terms of the headings otherwise require, paper, paperboard, cellulose wadding and webs of cellulose fibers answering to a description in two or more of the headings 4801 to 4811 are to be classified under that one of such headings which occurs last in numerical order in the tariff schedule.

8. Headings 4801 and 4803 to 4809 apply only to paper, paperboard, cellulose wadding and webs of cellulose fibers:

   (a) In strips or rolls of a width exceeding 36 cm; or

   (b) In rectangular (including square) sheets with one side exceeding 36 cm and the other side exceeding 15 cm in the unfolded state.

9. For the purposes of heading 4814, the expression "wallpaper and similar wall coverings" applies only to:

   (a) Paper in rolls, of a width of not less than 45 cm and not more than 160 cm, suitable for wall or ceiling decoration:

      (i) Grained, embossed, surface-colored, design-printed or otherwise surface-decorated (for example, with textile flock), whether or not coated or covered with transparent protective plastics;

      (ii) With an uneven surface resulting from the incorporation of particles of wood, straw, etc.;

      (iii) Coated or covered on the face side with plastics, the layer of plastics being grained, embossed, colored, design-printed or otherwise decorated; or

      (iv) Covered on the face side with plaiting material, whether or not bound together in parallel strands or woven;

   (b) Borders and friezes of paper, treated as above, whether or not in rolls, suitable for wall or ceiling decoration;

   (c) Wall coverings of paper made up of several panels, in rolls or sheets, printed so as to make up a scene, design or motif when applied to a wall.

   Products on a base of paper or paperboard, suitable for use both as floor coverings and as wall coverings, are to be classified in heading 4823.

10. Heading 4820 does not cover loose sheets or cards, cut to size, whether or not printed, embossed or perforated.

11. Heading 4823 applies, inter alia, to perforated paper or paperboard cards for Jacquard or similar machines and paper lace.

12. Except for the articles of heading 4814 or 4821, paper, paperboard, cellulose wadding and articles thereof, printed with motifs, characters or pictorial representations, which are not merely incidental to the primary use of the goods, fall in chapter 49.

Subheading Notes

1. For the purposes of subheading 4804.11 and 4804.19, "kraftliner" means machine-finished or machine-glazed paper and paperboard, of which not less than 80 percent by weight of the total fiber content consists of wood fibers obtained by the chemical sulfate or soda processes, in rolls, weighing more than 115 g/m^2 and having a minimum Mullen bursting strength, as indicated in the following table, or the linearly interpolated or extrapolated equivalent for any other weight:

PRINTED BOOKS, NEWSPAPERS, PICTURES AND OTHER PRODUCTS OF THE PRINTING INDUSTRY; MANUSCRIPTS, TYPESCRIPTS AND PLANS

Notes

1. This chapter does not cover:

   (a) Photographic negatives or positives on transparent bases (chapter 37);

   (b) Maps, plans or globes, in relief, whether or not printed (heading 9023);

   (c) Playing cards or other goods of chapter 95; or

   (d) Original engravings, prints or lithographs (heading 9702), postage or revenue stamps, stamp-postmarks, first-day covers, postal stationery or the like of heading 9704, antiques of an age exceeding one hundred years or other articles of chapter 97.

2. For the purposes of chapter 49 the term "printed" also means reproduced by means of a duplicating machine, produced under the control of an automatic data processing machine, embossed, photographed, photocopied, thermocopied or typewritten.

3. Newspapers, journals and periodicals which are bound otherwise than in paper, and sets of newspapers, journals or periodicals comprising more than one issue under a single cover are to be classified in heading 4901, whether or not containing advertising material.

4. Heading 4901 also covers:

   (a) A collection of printed reproductions of, for example, works of art or drawings, with a relative text, put up with numbered pages in a form suitable for binding into one or more volumes;

   (b) A pictorial supplement accompanying and subsidiary to, a bound volume; and

   (c) Printed parts of books or booklets, in the form of assembled or separate sheets or signatures, constituting the whole or a part of a complete work and designed for binding.

   However, printed pictures or illustrations not bearing a text, whether in the form of signatures or separate sheets, fall in heading 4911.

5. Subject to note 3 of this chapter, heading 4901 does not cover publications which are essentially devoted to advertising (for example, brochures, pamphlets, leaflets, trade catalogs, yearbooks published by trade associations and tourist promotional literature). Such publications are to be classified in heading 4911.

6. For the purposes of heading 4903, the expression "children's picture books" means books for children in which the pictures form the principal interest and the text is subsidiary.

Additional U.S. Notes

1. For the purposes of determining the classification of printed matter produced in whole or in part by a lithographic process, the thickness of such printed matter is that of the thinnest paper contained therein, except that the thickness of a permanently mounted lithograph is the combined thickness of the lithograph and its mounting.

2. Currency in current circulation in any country imported for monetary purposes and securities and similar evidences of value provided for in heading 4907 shall be admitted without formal customs consumption entry or the payment of duty. This does not affect any requirement under other provisions of law to the effect that transfers of monetary instruments into or through the United States, in an amount exceeding $10,000 on any one occasion, shall be reported as prescribed therein.

2. (A) Goods classifiable in chapters 50 to 55 or in heading 5809 or 5902 and of a mixture of two or more textile materials are to be classified as if consisting wholly of that one textile material which predominates by weight over each other single textile material.

When no one textile material predominates by weight, the goods are to be classified as if consisting wholly of that one textile material which is covered by the heading which occurs last in numerical order among those which equally merit consideration.

(B) For the purposes of the above rule:

(a) Gimped horsehair yarn (heading 5110) and metalized yarn (heading 5605) are to be treated as a single textile material the weight of which is to be taken as the aggregate of the weights of its components; for the classification of woven fabrics, metal thread is to be regarded as a textile material;

(b) The choice of appropriate heading shall be effected by determining first the chapter and then the applicable heading within that chapter, disregarding any materials not classified in that chapter;

(c) When both chapters 54 and 55 are involved with any other chapter, chapters 54 and 55 are to be treated as a single chapter;

(d) Where a chapter or a heading refers to goods of different textile materials, such materials are to be treated as a single textile material.

(C) The provisions of paragraphs (A) and (B) above apply also to the yarns referred to in notes 3, 4, 5 or 6 below.

3. (A) For the purposes of this section, and subject to the exceptions in paragraph (B) below, yarns (single, multiple (folded) or cabled) of the following descriptions are to be treated as "twine, cordage, ropes and cables":

(a) Of silk or waste silk, measuring more than 20,000 decitex;

(b) Of man-made fibers (including yarn of two or more monofilaments of chapter 54), measuring more than 10,000 decitex;

(c) Of true hemp or flax:

(i) Polished or glazed, measuring 1,429 decitex or more; or

(ii) Not polished or glazed, measuring more than 20,000 decitex;

(d) Of coir, consisting of three or more plies;

(e) Of other vegetable fibers, measuring more than 20,000 decitex; or

(f) Reinforced with metal thread.

(B) Exceptions:

(a) Yarn of wool or other animal hair and paper yarn, other than yarn reinforced with metal thread;

(b) Man-made filament tow of chapter 55 and multifilament yarn without twist or with a twist of less than 5 turns per meter of chapter 54;

(c) Silkworm gut of heading 5006 and monofilaments of chapter 54;

(d) Metalized yarn of heading 5605; yarn reinforced with metal thread is subject to paragraph (A)(f) above; and

(e) Chenille yarn, gimped yarn and loop wale-yarn of heading 5606.

4. (A) For the purposes of chapters 50, 51, 52, 54 and 55, the expression "put up for retail sale" in relation to yarn means, subject to the exceptions in paragraph (B) below, yarn (single, multiple (folded) or cabled) put up:

(a) On cards, reels, tubes or similar supports, of a weight (including support) not exceeding:

(i) 85 g in the case of silk, waste silk or man-made filament yarn; or

(ii) 125 g in other cases;

(b) In balls, hanks or skeins of a weight not exceeding:

(i) 85 g in the case of man-made filament yarn of less than 3,000 decitex, silk or silk waste;

(ii) 125 g in the case of all other yarns of less than 2,000 decitex; or

(iii) 500 g in other cases;

(c) In hanks or skeins comprising several smaller hanks or skeins separated by dividing threads which render them independent one of the other, each of uniform weight not exceeding:

(i) 85 g in the case of silk, waste silk or man-made filament yarn; or

(ii) 125 g in other cases.

(B) Exceptions:

(a) Single yarn of any textile material, except:

(i) Single yarn of wool or fine animal hair, unbleached; and

(ii) Single yarn of wool or fine animal hair, bleached, dyed or printed, measuring more than 5,000 decitex;

(b) Multiple (folded) or cabled yarn, unbleached:

(i) Of silk or waste silk, however put up; or

(ii) Of other textile material except wool or fine animal hair, in hanks or skeins;

(ii) Put up on supports or in some other manner indicating its use in the textile industry (for example, on cops, twisting mill tubes, pirns, conical bobbins or spindles, or reeled in the form of cocoons for embroidery looms).

5. For the purposes of headings 5204, 5401 and 5508, the expression "sewing thread" means multiple (folded) or cabled yarn:

(a) Put up on supports (for example, reels, tubes) of a weight (including support) not exceeding 1,000 g;

(b) Dressed for use as sewing thread; and

(c) With a final "Z" twist.

6. For the purposes of this section, the expression "high tenacity yarn" means yarn having a tenacity, expressed in cN/tex (centinewtons per tex), greater than the following:

Single yarn of nylon or other polyamides, or of polyesters. . . . . 60 cN/tex

Multiple (folded) or cabled yarn of nylon or other polyamides, or of polyesters. . . . . 53 cN/tex

Single, multiple (folded) or cabled yarn of viscose rayon. . . . . 27 cN/tex.

7. For the purposes of this section, the expression "made up" means:

(a) Cut otherwise than into squares or rectangles;

(b) Produced in the finished state, ready for use (or merely needing separation by cutting dividing threads) without sewing or other working (for example, certain dusters, towels, tablecloths, scarf squares, blankets);

(c) Cut to size and with at least one heat-sealed edge with a visibly tapered or compressed border and the other edges treated as described in any other subparagraph of this note, but excluding fabrics the cut edges of which have been prevented from unraveling by hot cutting or by other simple means;

(d) Hemmed or with rolled edges, or with a knotted fringe at any of the edges, but excluding fabrics the cut edges of which have been prevented from unraveling by whipping or by other simple means;

(e) Cut to size and having undergone a process of drawn thread work;

(f) Assembled by sewing, gumming or otherwise (other than piece goods consisting of two or more lengths of identical material joined end to end and piece goods composed of two or more textiles assembled in layers, whether or not padded); or

(g) Knitted or crocheted to shape, whether presented as separate items or in the form of a number of items in the length.

8. For the purposes of chapters 50 to 60:

(a) Chapters 50 to 55 and 60 and, except where the context otherwise requires, chapters 56 to 59, do not apply to goods made up within the meaning of note 7 above; and

(b) Chapters 50 to 55 and 60 do not apply to goods of chapters 56 to 59.

9. The woven fabrics of chapters 50 to 55 include fabrics consisting of layers of parallel textile yarns superimposed on each other at acute or right angles. These layers are bonded at the intersections of the yarns by an adhesive or by thermal bonding.

10. Elastic products consisting of textile materials combined with rubber threads are classified in this section.

11. For the purposes of this section, the expression "impregnated" includes "dipped."

12. For the purposes of this section, the expression "polyamides" includes "aramids."

13. For the purposes of this Section and, where applicable, throughout the tariff schedule, the expression “elastomeric yarn” means filament yarn, including monofilament, of synthetic textile material, other than textured yarn, which does not break on being extended to three times its original length and which returns, after being extended to twice its original length, within a period of five minutes, to a length not greater than one and a half times its original length.

14. Unless the context otherwise requires, textile garments of different headings are to be classified in their own headings even if put up in sets for retail sale. For the purposes of this note, the expression "textile garments" means garments of headings 6101 to 6114 and headings 6201 to 6211.

Subheading Notes

1. In this section and, where applicable, throughout the tariff schedule, the following expressions have the meanings hereby assigned to them:

(a) Unbleached yarn

Yarn which:

(i) Has the natural color of its constituent fibers and has not been bleached, dyed (whether or not in the mass) or printed; or

(ii) Is of indeterminate color ("grey yarn"), manufactured from garnetted stock.

Such yarn may have been treated with a colorless dressing or fugitive dye (which disappears after simple washing with soap) and, in the case of man-made fibers, treated in the mass with delustering agents (for example, titanium dioxide).

(b) Bleached yarn

Yarn which:

(i) Has undergone a bleaching process, is made of bleached fibers or, unless the context otherwise requires, has been dyed white (whether or not in the mass) or treated with a white dressing;

(ii) Consists of a mixture of unbleached and bleached fibers; or

(iii) Is multiple (folded) or cabled and consists of unbleached and bleached yarns.

Subheading Note 1 (con):

(c) Colored (dyed or printed) yarn

Yarn which:

(i) Is dyed (whether or not in the mass) other than white or in a fugitive color, or printed, or made from dyed or printed fibers;

(ii) Consists of a mixture of dyed fibers of different colors or of a mixture of unbleached or bleached fibers with colored fibers (marl or mixture yarns), or is printed in one or more colors at intervals to give the impression of dots;

(iii) Is obtained from slivers or rovings which have been printed; or

(iv) Is multiple (folded) or cabled and consists of unbleached or bleached yarn and colored yarn.

The above definitions also apply, mutatis mutandis, to monofilament and to strip or the like of chapter 54.

(d) Unbleached woven fabric

Woven fabric made from unbleached yarn and which has not been bleached, dyed or printed. Such fabric may have been treated with a colorless dressing or a fugitive dye.

(e) Bleached woven fabric

Woven fabric which:

(i) Has been bleached or, unless the context otherwise requires, dyed white or treated with a white dressing, in the piece;

(ii) Consists of bleached yarn; or

(iii) Consists of unbleached and bleached yarn.

(f) Dyed woven fabric

Woven fabric which:

(i) Is dyed a single uniform color other than white (unless the context otherwise requires) or has been treated with a colored finish other than white (unless the context otherwise requires), in the piece; or

(ii) Consists of colored yarn of a single uniform color.

(g) Woven fabric of yarns of different colors

Woven fabric (other than printed woven fabric) which:

(i) Consists of yarns of different colors or yarns of different shades of the same color (other than the natural color of the constituent fibers);

(ii) Consists of unbleached or bleached yarn and colored yarn; or

(iii) Consists of marl or mixture yarns.

(In all cases, the yarn used in selvages and piece ends is not taken into consideration.)

(h) Printed woven fabric

Woven fabric which has been printed in the piece, whether or not made from yarns of different colors.

(The following are also regarded as printed woven fabrics: woven fabrics bearing designs made, for example, with a brush or spray gun, by means of transfer paper, by flocking or by the batik process.)

The definitions at (d) to (h) above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

(ij) Plain weave

A fabric construction in which each yarn of the weft passes alternately over and under successive yarns of the warp and each yarn of the warp passes alternately over and under successive yarns of the weft.

The definitions at (d) to (h) above apply, *mutatis mutandis*, to knitted or crocheted fabrics.

2. (A) Products of chapters 56 to 63 containing two or more textile materials are to be regarded as consisting wholly of that textile material which would be selected under note 2 to this section for the classification of a product of chapters 50 to 55 or of heading 5809 consisting of the same textile materials.

   (B) For the application of this rule:

      (a) Where appropriate, only the part which determines the classification under general interpretative rule 3 shall be taken into account;

      (b) In the case of textile products consisting of a ground fabric and a pile or looped surface no account shall be taken of the ground fabric;

      (c) In the case of embroidery of heading 5810 and goods thereof, only the ground fabric shall be taken into account. However, embroidery without visible ground, and goods thereof, shall be classified with reference to the embroidering threads alone.

Additional U.S. Notes

1. In the case of each provision in the tariff schedule on which the United States has agreed to reduce the rate of duty, pursuant to a trade agreement entered into under section 101 of the Trade Act of 1974 before January 3, 1980, on any cotton, wool or man-made fiber textile product as defined in the Arrangement Regarding International Trade in Textiles, as extended on December 14, 1977 (the Arrangement), if the Arrangement, or a substitute arrangement, including unilateral import restrictions or bilateral agreements, determined by the President to be suitable, ceases to be in effect with respect to the United States before the total reduction in the rate of duty for such provision under sections 101 and 109 of the Trade Act of 1974 has become effective, then the President shall proclaim the rate of duty in rate column 1 for such provision existing on January 1, 1975, to be the rate of duty effective, with respect to articles entered or withdrawn from warehouse for consumption, within 30 days after such cessation and until the President proclaims the continuation of such reduction under the next sentence. If subsequently the Arrangement or a substitute arrangement, including unilateral import restrictions or bilateral agreements, determined by the President to be suitable, is in effect with respect to the United States, then the President shall proclaim the continuation of the reduction of such rate of duty pursuant to such trade agreement. For purposes of section 109(c)(2) of the Trade Act of 1974, any time when a rate of duty existing on January 1, 1975, is in effect under this note shall be time when part of such reduction is not in effect by reason of legislation of the United States or action thereunder.

2. The term "Certified hand-loomed and folklore" as used with respect to products provided for in the tariff schedule, refers to such products as have been certified, in accordance with procedures established by the United States Trade Representative pursuant to international understandings, by an official of a government agency of the country where the products were produced, to have been so made.

   (c) The rate of duty in the "Special" subcolumn of rates of duty column 1 followed by the symbol "MX" in parentheses shall apply to imports from Mexico, up to the annual quantities specified in subdivision (g)(ii) of this note, of textile or apparel goods provided for in chapters 61, 62 and 63 that are sewn or otherwise assembled in the territory of Mexico, from fabric cut in the territory of the United States, such fabric having been knit or woven outside the territory of the United States or Mexico, which (i) were exported from the United States in condition ready for assembly without further fabrication, (ii) have not lost their physical identity in such articles by change in form, shape or otherwise, and (iii) have not been advanced in value or improved in condition in Mexico except by being assembled and except by operations incidental to the assembly process. This subdivision shall not apply after quantitative restrictions established pursuant to the Multifiber Arrangement or any successor agreement are terminated. [**Compiler's Note**: The quantitative restrictions of the Multifiber Arrangement terminated on January 1, 2005.]

1. Restraints under the Arrangement regarding International Trade in Textiles may not apply to developing country exports of "hand-loomed and folklore products" which have been certified, in accordance with procedures established by the Committee for the Implementation of Textile Agreements pursuant to international understandings, by an official of a government agency of the country where the products were produced, to have been so made. The importer is required to identify such certified products on the entry summary or withdrawal forms by placing the symbol "F" as a prefix to the appropriate 10-digit statistical reporting number.

2. For the purposes of the Tariff Schedule:

   (a) The term "subject to cotton restraints" means articles in which:

      (i) The cotton component equals or exceeds 50 percent by weight of all the component fibers thereof; or

      (ii) The cotton and any wool, fine animal hair or man-made fibers in the aggregate equals or exceeds 50 percent by weight of all the component fibers thereof and the cotton component equals or exceeds the weight of each of the wool (including fine animal hair) and man-made fiber components.

   (b) The term "subject to wool restraints" means articles not provided for in (a) above and in which the wool (including fine animal hair) component exceeds 17 percent by weight of all the component fibers thereof.

   (c) The term "subject to man-made fiber restraints" means articles not provided for in (a) or (b) above and the man-made fiber component, or the man-made fibers and any cotton, wool or fine animal hair in the aggregate, equals or exceeds 50 percent by weight of all the component fibers thereof.

   For the application of this note, where appropriate, only the part of the product which determines the classification under general interpretive rule 3 shall be taken into account.

3. The unit of measure to be used by Customs field offices when reporting imports of textiles to Customs Headquarters Quota Section shall be the first unit of quantity unless the second unit of quantity (if there is one) is underlined, in which case the second unit of quantity shall be reported.

4. As a convenient cross-reference, each of the textile categories (or groupings) used by the United States in monitoring shipments of these products and to administer the United States textile trade agreements programs is listed in the schedule following the appropriate 10-digit description.

5. Entries of all textile and apparel products that are both (a) imported from Canada or from Mexico and (b) described in additional U.S. notes 3 (other than subdivision (c)), 4 and 5 to section XI must contain (i) the appropriate 10-digit statistical reporting number from and units of quantity specified in section XI for such goods, and (ii) the correct 8-digit special statistical reporting number applicable to such goods and the square meter equivalent of the goods being entered, determined in accordance with such additional U.S. notes. The special statistical reporting numbers are set forth at the end of chapter 99 of this schedule. For goods described in subdivision (c) of additional U.S. note 3, see heading 9802.00.80.

HORSEHAIR YARN AND WOVEN FABRIC

Note

1. Throughout the tariff schedule:

   (a) "Wool" means the natural fiber grown by sheep or lambs;

   (b) "Fine animal hair" means the hair of alpaca, llama, vicuna, camel (including dromedary), yak, Angora, Tibetan, Kashmir or similar goats (but not common goats), rabbit (including Angora rabbit), hare, beaver, nutria or muskrat; and

   (c) "Coarse animal hair" means the hair of animals not mentioned above, excluding brush-making hair and bristles (heading 0502) and horsehair (heading 0511).

Additional U.S. Notes

1. For the purposes of headings 5101, 5102, 5103 and 5104, regarding any package containing wool or fine animal hair subject to different rates of duty, notwithstanding the rates of duty shown, the column 1 rate of duty is the highest column 1 rate applicable to any part of the contents of the package comprising not less than 10 percent thereof by weight and the column 2 rate of duty is the highest column 2 rate applicable to any part of the contents of the package comprising not less than 10 percent thereof by weight.

2. For the purposes of this chapter:

   (a) The term "clean kg" in the rate columns means kilogram of clean yield;

   (b) The term "clean yield," except for purposes of carbonized fibers, means the absolute clean content (i.e., all that portion of the merchandise which consists exclusively of wool or hair free of all vegetable and other foreign material, containing by weight 12 percent of moisture and 1.5 percent of material removable from the wool or hair by extraction with alcohol, and having an ash content of not over 0.5 percent by weight), less an allowance, equal by weight to 0.5 percent of the absolute clean content plus 60 percent of the vegetable matter present, but not exceeding 15 percent by weight of the absolute clean content, for wool or hair that would ordinarily be lost during commercial cleaning operations;

   (c) For purposes of carbonized fibers, the term "clean yield" means in the condition as entered;

   (d) (i) The term "wool for special uses" means unimproved wool and other wool of whatever blood or origin not finer than 46s entered by a dealer, manufacturer or processor, and certified for use only in the manufacture of felt or knit boots, floor coverings, heavy fulled lumbermen's socks, press cloth, papermakers' felts or pressed felt for polishing plate and mirror glass;

   (ii) Wool for special uses shall not be released from customs custody unless the dealer, manufacturer or processor files a bond to insure that any wool entered as wool for special uses shall be used only (except as provided below) in the manufacture of the articles enumerated in subparagraph (i) above;

   (iii) A dealer, manufacturer or processor may be relieved of liability under his or her bond with respect to any wool entered as wool for special uses which is transferred in its imported or any other form to another dealer, manufacturer or processor who has filed a bond to insure that the merchandise so transferred shall be used only (except as provided below) in the manufacture of the articles enumerated in subparagraph (i) above;

   (iv) When wool entered as wool for special uses is used, or transferred for use, otherwise than in the manufacture of the articles enumerated in subparagraph (i) above:

   (A) the regular duties which would have been applicable to such wool in the condition as entered shall be paid by the dealer, manufacturer or processor whose bond is charged with the wool at the time of such use or transfer for such use, but such duties shall not be levied or collected on any waste or byproducts resulting from the usual course of manufacture of the articles enumerated in subparagraph (i) above or on any merchandise which is destroyed or exported;

   (B) if prior to such use or transfer for such use there shall have been combined or mixed with such wool any other merchandise, the whole of the combination or mixture shall be regarded as being composed of wool entered as wool for special uses, unless the dealer, manufacturer or processor liable for the payment of the duties shall establish the quantity of bonded wool in such combination or mixture;

Additional U.S. Note 2 (con.):

(C) every dealer, manufacturer or processor who has given a bond pursuant to the provisions for wool for special uses shall report any transfer or use of merchandise contrary to the terms of the bond, within 30 days after such transfer or use, to the district director of customs in whose district the bond is filed, and for failure to so report such dealer, manufacturer or processor shall be liable to a penalty (in addition to the duties provided for) equal to the value of the merchandise so transferred or used at the time and place of such transfer or use; and

(D) the clean yield of any wool shall be deemed to be 100 percent, unless the actual clean yield has been determined by suitable tests and such use or transfer for use occurs not later than 3 years after the date of entry of such wool;

(e) The term "unimproved wool" means Aleppo, Arabian, Bagdad, Black Spanish, Chinese, Cordova, Cyprus, Donskoi, East Indian, Ecuadorean, Egyptian, Georgian, Haslock, Iceland, Karakul, Kerry, Manchurian, Mongolian, Oporto, Persian, Pyrenean, Sardinian, Scotch Blackface, Sistan, Smyrna, Sudan, Syrian, Tibetan, Turkestan, Valparaiso or Welsh Mountain wool and similar wool not improved by the admixture of merino or English blood; and

(f) The standards for determining grades of wool shall be those which are established from time to time by the Secretary of Agriculture pursuant to law and which are in effect on the date of importation of the wool.

CHAPTER 52

COTTON 1/

Subheading Note

1. For the purposes of subheadings 5209.42 and 5211.42, the expression "denim" means fabrics of yarns of different colors, of 3-thread or 4-thread twill, including broken twill, warp faced, the warp yarns of which are of one and the same color and the weft yarns of which are unbleached, bleached, dyed grey or colored a lighter shade of the color of the warp yarns.

Additional U.S. Notes

1. Under regulations prescribed by the Secretary of the Treasury, the staple length of cotton shall be determined for all customs purposes by application of the Official Cotton Standards of the United States for length of staple, as established by the Secretary of Agriculture and in effect when the determination is to be made.

2. For the purposes of classifying yarns of headings 5205 and 5206 the term "nm," as applied in these headings, means the number of 1,000-meter lengths of yarn in one kilogram. To determine the nm measurement of any yarn, whether single, multiple (folded) or cabled, the actual meters per kilogram shall be divided by 1,000 and the quotient thereof multiplied by the number of single yarns therein, including the single yarns used in manufacturing multiple (folded) or cabled yarns.

3. For the purposes of the woven fabrics of chapter 52:

   (a) The term "number," as applied to woven fabrics of cotton, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number for tariff purposes--

$$N = \frac{BYT}{1{,}000}, \quad \frac{100T}{Z'}, \quad \frac{BT}{Z} \quad \text{or} \quad \frac{ST}{10}$$

   when:

   N is the average yarn number,
   B is the breadth (width) of the fabric in centimeters,
   Y is the meters (linear) of the fabric per kilogram,
   T is the total single yarns per square centimeter,
   S is the square meters of fabric per kilogram,
   Z is the grams per linear meter of fabric, and
   Z' is the grams per square meter of fabric.

   Fractions in the resulting "number" shall be disregarded.

   (b) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.

4. For the purposes of heading 5208 and 5209, the term "certified hand-loomed fabrics" means fabrics made on a hand loom (i.e., a nonpower-driven loom) by a cottage industry and which prior to exportation have been certified by an official of a government agency of the country where the fabrics were produced to have been so made.

Statistical Note

1. For the purposes of the woven fabrics of chapter 52:

(a) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:

(i) Fabrics weighing not more than 200 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and

(ii) Fabrics weighing more than 200 grams per square meter, of average yarn number 26 or lower number.

(b) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:

(i) Fabrics weighing not more than 200 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and

OTHER VEGETABLE TEXTILE FIBERS; PAPER YARN AND WOVEN FABRICS OF PAPER YARN 1/

Statistical Note

1. For the purposes of the woven fabrics of chapter 53:

   (a) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.

   (b) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:

      (i) Fabrics weighing not more than 200 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and

      (ii) Fabrics weighing more than 200 grams per square meter, of average yarn number 26 or lower number.

   (c) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:

      (i) Fabrics weighing not more than 200 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and

      (ii) Fabrics weighing more than 200 grams per square meter, but does not include:

         (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and

         (B) Fabrics of average yarn number 27 or higher number, not of square construction.

   (d) The term "printcloth" means plain weave fabrics, weighing not more than 200 grams per square meter, of average yarn numbers 43-68, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, not combed, whether or not napped.

   (e) The term "square construction" means fabrics of the following types:

      (i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or

      (ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.

   (f) The term "napped" means fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flannel, moleskin, etc., are typical fabrics with a nap.

   (g) The term "not combed" means fabrics wholly or in part of uncombed cotton, other vegetable textile fibers or wool or fine animal hair.

   (h) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed, whether or not containing other fibers.

Statistical note 1 (con.)

(ij) The term "number," as applied to woven fabrics of chapter 53, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number--

$$N = \frac{BYT}{1{,}000}, \quad \frac{100T}{Z'}, \quad \frac{BT}{Z} \quad \text{or} \quad \frac{ST}{10}$$

when:

N is the average yarn number,
B is the breadth (width) of the fabric in centimeters,
Y is the meters (linear) of the fabric per kilogram,
T is the total single yarns per square centimeter,
S is the square meters of fabric per kilogram,
Z is the grams per linear meter of fabric, and
Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

CHAPTER 54

MAN-MADE FILAMENTS; STRIP AND THE LIKE OF MAN-MADE TEXTILE MATERIALS 1/

Notes

1. Throughout the tariff schedule, the term "man-made fibers" means staple fibers and filaments of organic polymers produced by manufacturing processes, either:

   (a) By polymerization of organic monomers to produce polymers such as polyamides, polyesters, polyolefins or polyurethanes, or by chemical modification of polymers produced by this process (for example, poly(vinyl alcohol) prepared by the hydrolysis of poly(vinyl acetate)); or

   (b) By dissolution or chemical treatment of natural organic polymers (for example, cellulose) to produce polymers such as cuprammonium rayon (cupro) or viscose rayon, or by chemical modification of natural organic polymers (for example, cellulose, casein and other proteins, or alginic acid), to produce polymers such as cellulose acetate or alginates.

   The terms "synthetic" and "artificial", used in relation to fibers, mean: synthetic: fibers as defined at (a); artificial: fibers as defined at (b). Strip and the like of heading 5404 or 5405 are not considered to be man-made fibers.

   The terms "man-made", "synthetic" and "artificial" shall have the same meanings when used in relation to "textile materials".

2. Headings 5402 and 5403 do not apply to synthetic or artificial filament tow of chapter 55.

Statistical Note

1. For the purposes of the woven fabrics of chapter 54:

   (a) Unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.

   (b) The term "flat fabrics" means fabrics not containing yarns twisted more than 472 turns per meter.

   (c) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:

      (i) Fabrics weighing not more than 170 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and

      (ii) Fabrics weighing more than 170 grams per square meter, of average yarn number 26 or lower number.

   (d) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:

      (i) Fabrics weighing not more than 170 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and

      (ii) Fabrics weighing more than 170 grams per square meter, but does not include:

         (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and

         (B) Fabrics of average yarn number 27 or higher number, not of square construction.

   (e) The term "printcloth" means plain weave fabrics, weighing not more than 170 grams per square meter, of average yarn numbers 43-68, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, whether or not napped, of the following types:

      (i) Fabrics, not combed; and

      (ii) Other fabrics, measuring less than 168 cm in width.

   (f) The term "square construction" means fabrics of the following types:

      (i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or

      (ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.

1/ See Section XI, Statistical Note 5.

Statistical Note 1 (con.)

(g) The term "napped" means fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flannel, moleskin, etc., are typical fabrics with a nap.

(h) The term "not combed" means fabrics in part of uncombed cotton, other vegetable textile fibers or wool or fine animal hair.

(ij) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed.

(k) The term "number," as applied to woven fabrics of man-made fibers, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number--

$$N = \frac{BYT}{1{,}000}, \quad \frac{100T}{Z'}, \quad \frac{BT}{Z} \quad \text{or} \quad \frac{ST}{10}$$

when:

N is the average yarn number,
B is the breadth (width) of the fabric in centimeters,
Y is the meters (linear) of the fabric per kilogram,
T is the total single yarns per square centimeter,
S is the square meters of fabric per kilogram,
Z is the grams per linear meter of fabric, and
Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

2. The term "discharge printed" fabrics refers to fabrics which have been:

(a) Dyed, not tinted, a single uniform color other than white;

(b) Further processed using a method whereby chlorine or other color-destroying chemicals are applied to discrete portions of the dyed fabric to bleach out or discharge the dye and printed in those discrete portions thereby yielding a different colored pattern on the previously dyed ground; and

(c) Subjected to two or more of the following finishing operations: bleaching, shrinking, filling, napping, decating, permanent stiffening, weighting, permanent embossing or moireing.

CHAPTER 55

MAN-MADE STAPLE FIBERS 1/

Note

1. Headings 5501 and 5502 apply only to man-made filament tow, consisting of parallel filaments of a uniform length equal to the length of the tow, meeting the following specifications:

   (a) Length of tow exceeding 2 m;

   (b) Twist less than 5 turns per meter;

   (c) Measuring per filament less than 67 decitex;

   (d) Synthetic filament tow only: the tow must be drawn, that is to say, be incapable of being stretched by more than 100 percent of its length; and

   (e) Total measurement of tow more than 20,000 decitex.

   Tow of a length not exceeding 2 m is to be classified in heading 5503 or 5504.

Additional U.S. Note

1. For the purposes of the woven fabrics of chapter 55, unless the context otherwise requires, provisions relating to one or more weaves embrace only those fabrics which (excluding selvage) are wholly of the specified weave or weaves, including combinations exclusively thereof.

Statistical Note

1. For the purposes of the woven fabrics of chapter 55:

   (a) The term "poplin or broadcloth" means plain weave fabrics, not of square construction, whether or not napped, but does not include the following types:

      (i) Fabrics weighing not more than 170 grams per square meter, containing 33 or less warp ends and filling picks per square centimeter; and

      (ii) Fabrics weighing more than 170 grams per square meter, of average yarn number 26 or lower number.

   (b) The term "sheeting" means plain weave fabrics, whether or not napped, of the following types:

      (i) Fabrics weighing not more than 170 grams per square meter, of square construction, containing more than 33 warp ends and filling picks per square centimeter, of average yarn number 68 or lower number, but not including printcloth; and

      (ii) Fabrics weighing more than 170 grams per square meter, but does not include:

         (A) Fabrics of which the warp or filling consists of multiple (folded) or cabled yarns, of average yarn number 26 or lower number; and

         (B) Fabrics of average yarn number 27 or higher number, not of square construction.

   (c) The term "printcloth" means plain weave fabrics, weighing not more than 170 grams per square meter, of average yarn numbers 43-68, containing more than 33 singles yarns per square centimeter and not containing multiple (folded) or cabled yarns, of square construction, whether or not napped, of the following types:

      (i) Fabrics, not combed; and

      (ii) Other fabrics, measuring less than 168 cm in width.

   (d) The term "cheesecloth" means plain weave fabrics, weighing not more than 170 grams per square meter, containing not more than 33 warp ends and filling picks per square centimeter, whether or not napped.

1/ See Section XI, Statistical Note 5.

Statistical Note 1 (con.)

(e) The term "lawns, voiles or batistes" means plain weave fabrics, weighing not more than 170 grams per square meter, of average yarn number 69 or higher number, consisting of more than 33 warp ends and filling picks per square centimeter, of square construction, whether or not napped.

(f) The term "duck" means fabrics weighing more than 170 grams per square meter, of average yarn number 26 or lower number, whether or not napped, of the following types:

(i) Plain weave, of which the warp or filling consists of multiple (folded) or cabled yarns; or

(ii) Woven as plain weave except that two or more warp ends are woven as one (taped warp), whether or not containing multiple (folded) or cabled yarns; this latter type of duck is not to be classified as a plain weave fabric.

(g) The term "oxford cloth" means fabrics weighing not more than 170 grams per square meter, whether or not napped, woven as plain weave except that two or more warp ends are woven as one (taped warp). Oxford cloth is not to be classified as a plain weave fabric.

(h) The term "blue denim" means fabrics weighing more than 170 grams per square meter, of 3-thread or 4-thread twill, including broken twill, warp faced, the warp yarns of which are dyed blue and the weft yarns of which are unbleached, bleached, dyed grey or colored a lighter shade of blue than that of the warp yarns.

(ij) The term "square construction" means fabrics of the following types:

(i) Containing less than 79 warp ends and filling picks per square centimeter, of which the difference between the total count of warp ends per centimeter and the total count of filling picks per centimeter is less than 11; or

(ii) Containing 79 or more warp ends and filling picks per square centimeter, of which the total count of warp ends per centimeter and the total count of filling picks per centimeter are each less than 57 percent of the total count per square centimeter of such warp ends and filling picks.

(k) The term "napped" means fabrics with a fuzzy, fibrous surface produced by scratching or pricking the surface so that some of the fibers are raised from the body of the yarn. Napped fabrics are not to be confused with pile fabrics. Outing and canton flannel, moleskin, etc., are typical fabrics with a nap.

(l) The term "not combed" means fabrics in part of uncombed cotton, other vegetable textile fibers or wool or fine animal hair.

(m) The term "combed" means fabrics containing cotton, other vegetable textile fibers or wool or fine animal hair, in which such fibers are combed.

(n) The term "number," as applied to woven fabrics of man-made fibers, means the average yarn number of the yarns contained therein. In computing the average yarn number, the length of the yarn is considered to be equal to the distance covered by it in the fabric in the condition as imported, with all clipped yarn being measured as if continuous and with the count being taken of the total single yarns in the fabric including the single yarns in any multiple (folded) or cabled yarns. The weight shall be taken after any excessive sizing is removed by boiling or other suitable process. Any one of the following formulas can be used to determine the average yarn number--

$$N = \frac{BYT}{1{,}000}, \quad \frac{100T}{Z'}, \quad \frac{BT}{Z} \quad \text{or} \quad \frac{ST}{10}$$

when:

N is the average yarn number,
B is the breadth (width) of the fabric in centimeters,
Y is the meters (linear) of the fabric per kilogram,
T is the total single yarns per square centimeter,
S is the square meters of fabric per kilogram,
Z is the grams per linear meter of fabric, and
Z' is the grams per square meter of fabric.

Fractions in the resulting "number" shall be disregarded.

2. The term "discharge printed" fabrics refers to fabrics which have been:

   (a) Dyed, not tinted, a single uniform color other than white;

   (b) Further processed using a method whereby chlorine or other color-destroying chemicals are applied to discrete portions of the dyed fabric to bleach out or discharge the dye and printed in those discrete portions thereby yielding a different colored pattern on the previously dyed ground; and

   (c) Subjected to two or more of the following finishing operations: bleaching, shrinking, filling, napping, decating, permanent stiffening, weighting, permanent embossing or moireing.

CHAPTER 56

WADDING, FELT AND NONWOVENS; SPECIAL YARNS; TWINE, CORDAGE, ROPES AND CABLES AND ARTICLES THEREOF

Notes

1. This chapter does not cover:

   (a) Wadding, felt or nonwovens, impregnated, coated or covered with substances or preparations (for example, perfumes or cosmetics of chapter 33, soaps or detergents of heading 3401, polishes, creams or similar preparations of heading 3405, fabric softeners of heading 3809) where the textile material is present merely as a carrying medium;

   (b) Textile products of heading 5811;

   (c) Natural or artificial abrasive powder or grain, on a backing of felt or nonwovens (heading 6805);

   (d) Agglomerated or reconstituted mica, on a backing of felt or nonwovens (heading 6814);

   (e) Metal foil on a backing of felt or nonwovens (generally section XIV or XV); or

   (f) Sanitary towels (pads) and tampons, napkins and napkin liners for babies and similar articles of heading 9619.

2. The term "felt" includes needleloom felt and fabrics consisting of a web of textile fibers the cohesion of which has been enhanced by a stitch-bonding process using fibers from the web itself.

3. Headings 5602 and 5603 cover respectively felt and nonwovens, impregnated, coated, covered or laminated with plastics or rubber whatever the nature of these materials (compact or cellular).

   Heading 5603 also includes nonwovens in which plastics or rubber forms the bonding substance.

   Headings 5602 and 5603 do not, however, cover:

   (a) Felt impregnated, coated, covered or laminated with plastics or rubber, containing 50 percent or less by weight of textile material or felt completely embedded in plastics or rubber (chapter 39 or 40);

   (b) Nonwovens, either completely embedded in plastics or rubber, or entirely coated or covered on both sides with such materials, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of color (chapter 39 or 40); or

   (c) Plates, sheets or strip of cellular plastics or cellular rubber combined with felt or nonwovens, where the textile material is present merely for reinforcing purposes (chapter 39 or 40).

CHAPTER 59

IMPREGNATED, COATED, COVERED OR LAMINATED TEXTILE FABRICS;
TEXTILE ARTICLES OF A KIND SUITABLE FOR INDUSTRIAL USE

Notes

1. Except where the context otherwise requires, for the purposes of this chapter the expression "textile fabrics" applies only to the woven fabrics of chapters 50 to 55 and headings 5803 and 5806, the braids and ornamental trimmings in the piece of heading 5808 and the knitted or crocheted fabrics of headings 6002 to 6006.

2. Heading 5903 applies to:

   (a) Textile fabrics, impregnated, coated, covered or laminated with plastics, whatever the weight per square meter and whatever the nature of the plastic material (compact or cellular), other than:

      (1) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of color;

      (2) Products which cannot, without fracturing, be bent manually around a cylinder of a diameter of 7 mm, at a temperature between 15°C and 30°C (usually chapter 39);

      (3) Products in which the textile fabric is either completely embedded in plastics or entirely coated or covered on both sides with such material, provided that such coating or covering can be seen with the naked eye with no account being taken of any resulting change of color (chapter 39);

      (4) Fabrics partially coated or partially covered with plastics and bearing designs resulting from these treatments (usually chapters 50 to 55, 58 or 60);

      (5) Plates, sheets or strip of cellular plastics, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (chapter 39); or

      (6) Textile products of heading 5811.

   (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with plastics, of heading 5604.

3. For the purposes of heading 5905, the expression "textile wall coverings" applies to products in rolls, of a width of not less than 45 cm, suitable for wall or ceiling decoration, consisting of a textile surface which has been fixed on a backing or has been treated on the back (impregnated or coated to permit pasting).

   This heading does not, however, apply to wall coverings consisting of textile flock or dust fixed directly on a backing of paper (heading 4814) or on a textile backing (generally heading 5907).

4. For the purposes of heading 5906, the expression "rubberized textile fabrics" means:

   (a) Textile fabrics impregnated, coated, covered or laminated with rubber:

      (i) Weighing not more than 1,500 g/m^2; or

      (ii) Weighing more than 1,500 g/m^2 and containing more than 50 percent by weight of textile material;

   (b) Fabrics made from yarn, strip or the like, impregnated, coated, covered or sheathed with rubber, of heading 5604; and

   (c) Fabrics composed of parallel textile yarns agglomerated with rubber, irrespective of their weight per square meter.

   This heading does not, however, apply to plates, sheets or strip of cellular rubber, combined with textile fabric, where the textile fabric is present merely for reinforcing purposes (chapter 40), or textile products of heading 5811.

5. Heading 5907 does not apply to:

   (a) Fabrics in which the impregnation, coating or covering cannot be seen with the naked eye (usually chapters 50 to 55, 58 or 60); for the purpose of this provision, no account should be taken of any resulting change of color;

   (b) Fabrics painted with designs (other than painted canvas being theatrical scenery, studio back-cloths or the like);

   (c) Fabrics partially covered with flock, dust, powdered cork or the like and bearing designs resulting from these treatments; however, imitation pile fabrics remain classified in this heading;

   (d) Fabrics finished with normal dressings having a basis of amylaceous or similar substances;

   (e) Wood veneered on a backing of textile fabrics (heading 4408);

   (f) Natural or artificial abrasive powder or grain, on a backing of textile fabrics (heading 6805);

   (g) Agglomerated or reconstituted mica, on a backing of textile fabrics (heading 6814); or

   (h) Metal foil on a backing of textile fabrics (generally Section XIV or XV).

6. Heading 5910 does not apply to:

   (a) Transmission or conveyor belting, of textile material, of a thickness of less than 3 mm; or

   (b) Transmission or conveyor belts or belting of textile fabric impregnated, coated, covered or laminated with rubber or made from textile yarn or cord impregnated, coated, covered or sheathed with rubber (heading 4010).

7. Heading 5911 applies to the following goods, which do not fall in any other heading of section XI:

   (a) Textile products in the piece, cut to length or simply cut to rectangular (including square) shape (other than those having the character of the products of headings 5908 to 5910), the following only:

      (i) Textile fabrics, felt and felt-lined woven fabrics, coated, covered or laminated with rubber, leather or other material, of a kind used for card clothing, and similar fabrics of a kind used for other technical purposes, including narrow fabrics made of velvet impregnated with rubber, for covering weaving spindles (weaving beams);

      (ii) Bolting cloth;

      (iii) Straining cloth of a kind used in oil presses or the like, of textile material or of human hair;

      (iv) Flat woven textile fabrics with multiple warp or weft, whether or not felted, impregnated or coated, of a kind used in machinery or for other technical purposes;

      (v) Textile fabric reinforced with metal, of a kind used for technical purposes;

      (vi) Cords, braids and the like, whether or not coated, impregnated or reinforced with metal, of a kind used in industry as packing or lubricating materials;

   (b) Textile articles (other than those of headings 5908 to 5910) of a kind used for technical purposes (for example, textile fabrics and felts, endless or fitted with linking devices, of a kind used in papermaking or similar machines (for example, for pulp or asbestos-cement), gaskets, washers, polishing discs and other machinery parts).

CHAPTER 60

KNITTED OR CROCHETED FABRICS 1/

Notes

1. This chapter does not cover:

   (a) Crochet lace of heading 5804;

   (b) Labels, badges or similar articles, knitted or crocheted, of heading 5807; or

   (c) Knitted or crocheted fabrics, impregnated, coated, covered or laminated, of chapter 59. However, knitted or crocheted pile fabrics, impregnated, coated, covered or laminated, remain classified in heading 6001.

2. This chapter also includes fabrics made of metal thread and of a kind used in apparel, as furnishing fabrics or for similar purposes.

3. Throughout the tariff schedule any reference to "knitted" goods includes a reference to stitch-bonded goods in which the chain stitches are formed of textile yarn.

Additional U.S. Note

1. For purposes of heading 6001, the term "long pile fabrics" refers to fabrics made by inserting fibers from card sliver into the loops of the ground fabric during knitting.

2. For purposes of this chapter, the term "open-work fabrics" means fabrics with stable open meshes, whether or not containing inwrought designs.

Statistical Note

1. For purposes of statistical reporting numbers 6001.92.0010 and 6001.92.0030, the term "velour" refers to fabrics containing 12 or more stitches per centimeter in the vertical direction.

1/ See Section XI, Statistical Note 5.

CHAPTER 61

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, KNITTED OR CROCHETED 1/

Notes

1. This chapter applies only to made up knitted or crocheted articles.

2. This chapter does not cover:

   (a) Goods of heading 6212;

   (b) Worn clothing or other worn articles of heading 6309;

   (c) Orthopedic appliances, surgical belts, trusses or the like (heading 9021).

3. For the purposes of headings 6103 and 6104:

   (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

   - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and

   - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swim-wear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, color and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

   If several separate components to cover the lower part of the body are presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

   The term "suit" includes the following sets of garments whether or not they fulfill all the above conditions:

   - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

   - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

   - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

   (b) The term "ensemble" means a set of garments (other than suits and articles of heading 6107, 6108 or 6109), composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

   - one garment designed to cover the upper part of the body, with the exception of pullovers which may form a second upper garment in the sole context of twin sets, and of waistcoats which may also form a second upper garment, and

   - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

   All of the components of an ensemble must be of the same fabric construction, style, color and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski-suits of heading 6112.

4. Headings 6105 and 6106 do not cover garments with pockets below the waist, with a ribbed waistband or other means of tightening at the bottom of the garment, or garments having an average of less than 10 stitches per linear centimeter in each direction counted on an area measuring at least 10 centimeters by 10 centimeters. Heading 6105 does not cover sleeveless garments.

1/ See Section XI, Statistical Note 5.

5. Heading 6109 does not cover garments with a drawstring, ribbed waistband or other means of tightening at the bottom of the garment.

6. For the purposes of heading 6111:

   (a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 centimeters;

   (b) Articles which are, prima facie, classifiable both in heading 6111 and in other headings of this chapter are to be classified in heading 6111.

7. For the purposes of heading 6112, "ski-suits", means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

   (a) A "ski overall," that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

   (b) A "ski ensemble," that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

   - one garment such as an anorak, windbreaker or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

   - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall.

   The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

   All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same color; they also must be of corresponding or compatible size.

8. Garments which are, prima facie, classifiable both in heading 6113 and in other headings of this chapter, excluding heading 6111, are to be classified in heading 6113.

9. Garments of this chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

   Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

10. Articles of this chapter may be made of metal thread.

Additional U.S. Note

1. For the purpose of heading 6111, the term "sets" means two or more different garments of headings 6111, 6209 or 6505 imported together, of corresponding sizes and intended to be worn together by the same person.

Statistical Notes

1. Merchandise entered together and classified for customs purposes as an ensemble, under subheadings 6103.21.00, 6103.22.00, 6103.23.00, 6103.29.10, 6104.2l.00, 6104.22.00, 6104.23.00 or 6104.29.10, or as a track suit under subheadings 6112.11.00, or 6112.12.00 shall be reported statistically as separate articles under the most appropriate 10-digit reporting number within the same 8-digit tariff subheading which provides for the ensemble or track suit, warm-up or jogging suit.

2. For purposes of headings 6103, 6104 and 6112, statistical provisions for shirts refer to garments provided for in headings 6105, 6106 and 6110, other than sweaters, pullovers, vests or cardigans referred to in statistical note 3 below.

3. For purposes of this chapter, statistical provisions for sweaters include garments, whether or not known as pullovers, vests or cardigans, the outer surfaces of which are constructed essentially with 9 or fewer stitches per 2 centimeters measured in the direction the stitches were formed, and garments, known as sweaters, where, due to their construction, the stitches on the outer surface cannot be counted in the direction the stitches were formed.

4. Certain garments of chapter 61 assembled abroad from components formed and cut in the United States which, after assembly have been subject to bleaching, garment dyeing or perma-pressing abroad, may be eligible for entry under a Special Access Regime. Eligibility must be established under a bilateral agreement, and entry must be in compliance with procedures established by the Committee for the Implementation of Textile Agreements. The importer is required to identify such garments on the entry summary or withdrawal forms by placing the symbol "H" as a prefix to the appropriate 10-digit chapter 61 tariff number.

5. Certain garments of chapter 61, manufactured (cut and assembled) from fabric formed in the United States, may be eligible for entry under the Outward Processing Program for textiles and apparel. Eligibility must be in compliance with procedures established by the Committee for the Implementation of Textile Agreements (CITA). The importer is required to identify such garments on the entry summary or withdrawal forms by placing the symbol "S" as a prefix to the appropriate 10-digit chapter 61 tariff number.

6. For the purposes of statistical reporting under heading 6110, the term “knit to shape” means garments knit to shape on flat-knitting machines, having a stitch count exceeding 9 stitches per 2 centimeters, but less than or equal to 18 stitches per 2 centimeters, measured on the outer surfaces of the fabric, in the direction on which the stitches are formed. For purposes of this statistical note, in the instances where both knit and purl stitches are usually counted, the purl stitches will be disregarded, and only the knit stitches on the outer surface of the fabric will be counted. All of the garment’s components, which include, but are not limited to, collars, plackets, cuffs, waistbands and pockets, are knit to shape. All of the components are assembled by looping and linking, including the side seams.

CHAPTER 62

ARTICLES OF APPAREL AND CLOTHING ACCESSORIES, NOT KNITTED OR CROCHETED 1/

Notes

1. This chapter applies only to made up articles of any textile fabric other than wadding, excluding knitted or crocheted articles (other than those of heading 6212).

2. This chapter does not cover:

   (a) Worn clothing or other worn articles of heading 6309;

   (b) Orthopedic appliances, surgical belts, trusses or the like (heading 9021).

3. For the purposes of headings 6203 and 6204:

   (a) The term "suit" means a set of garments composed of two or three pieces made up, in respect of their outer surface, in identical fabric and comprising:

   - one suit coat or jacket the outer shell of which, exclusive of sleeves, consists of four or more panels, designed to cover the upper part of the body, possibly with a tailored waistcoat in addition whose front is made from the same fabric as the outer surface of the other components of the set and whose back is made from the same fabric as the lining of the suit coat or jacket; and

   - one garment designed to cover the lower part of the body and consisting of trousers, breeches or shorts (other than swimwear), a skirt or a divided skirt, having neither braces nor bibs.

   All of the components of a "suit" must be of the same fabric construction, color and composition; they must also be of the same style and of corresponding or compatible size. However, these components may have piping (a strip of fabric sewn into the seam) in a different fabric.

   If several separate components to cover the lower part of the body area presented together (for example, two pairs of trousers or trousers and shorts, or a skirt or divided skirt and trousers), the constituent lower part shall be one pair of trousers, or, in the case of women's or girls' suits, the skirt or divided skirt, the other garments being considered separately.

   The term "suit" includes the following sets of garments whether or not they fulfill all the above conditions:

   - morning dress, comprising a plain jacket (cutaway) with rounded tails hanging well down at the back and striped trousers;

   - evening dress (tailcoat), generally made of black fabric, the jacket of which is relatively short at the front, does not close and has narrow skirts cut in at the hips and hanging down behind;

   - dinner jacket suits, in which the jacket is similar in style to an ordinary jacket (though perhaps revealing more of the shirt front), but has shiny silk or imitation silk lapels.

   (b) The term "ensemble" means a set of garments (other than suits and articles of heading 6207 or 6208) composed of several pieces made up in identical fabric, put up for retail sale, and comprising:

   - one garment designed to cover the upper part of the body, with the exception of waistcoats which may also form a second upper garment, and

   - one or two different garments, designed to cover the lower part of the body and consisting of trousers, bib and brace overalls, breeches, shorts (other than swimwear), a skirt or a divided skirt.

   All of the components of an ensemble must be of the same fabric construction, style, color and composition; they also must be of corresponding or compatible size. The term "ensemble" does not apply to track suits or ski-suits of heading 6211.

1/ See Section XI, Statistical Note 5.

4. For the purposes of heading 6209:

   (a) The expression "babies' garments and clothing accessories" means articles for young children of a body height not exceeding 86 centimeters;

   (b) Articles which are, prima facie, classifiable both in heading 6209 and in other headings of this chapter are to be classified in heading 6209.

5. Garments which are, prima facie, classifiable both in heading 6210 and in other headings of this chapter, excluding heading 6209, are to be classified in heading 6210.

6. For the purposes of heading 6211,"ski-suits" means garments or sets of garments which, by their general appearance and texture, are identifiable as intended to be worn principally for skiing (cross-country or alpine). They consist either of:

   (a) A "ski overall," that is, a one-piece garment designed to cover the upper and the lower parts of the body; in addition to sleeves and a collar the ski overall may have pockets or footstraps; or

   (b) A "ski ensemble," that is, a set of garments composed of two or three pieces, put up for retail sale and comprising:

   - one garment such as an anorak, windbreaker or similar article, closed by a slide fastener (zipper), possibly with a waistcoat in addition, and

   - one pair of trousers whether or not extending above waist level, one pair of breeches or one bib and brace overall.

   The "ski ensemble" may also consist of an overall similar to the one mentioned in paragraph (a) above and a type of padded, sleeveless jacket worn over the overall.

   All the components of a "ski ensemble" must be made up in a fabric of the same texture, style and composition whether or not of the same color; they also must be of corresponding or compatible size.

7. Scarves and articles of the scarf type, square or approximately square, of which no side exceeds 60 centimeters, are to be classified as handkerchiefs (heading 6213). Handkerchiefs of which any side exceeds 60 centimeters are to be classified in heading 6214.

8. Garments of this chapter designed for left over right closure at the front shall be regarded as men's or boys' garments, and those designed for right over left closure at the front as women's or girls' garments. These provisions do not apply where the cut of the garment clearly indicates that it is designed for one or other of the sexes.

   Garments which cannot be identified as either men's or boys' garments or as women's or girls' garments are to be classified in the headings covering women's or girls' garments.

9. Articles of this chapter may be made of metal thread.

Additional U.S. Notes

1. For the purpose of heading 6209, the term "sets" means two or more different garments of headings 6111, 6209 or 6505 imported together, of corresponding sizes and intended to be worn together by the same person.

2. For the purposes of subheadings 6201.92.15, 6201.93.30, 6202.92.15, 6202.93.45, 6203.41.05, 6203.43.15, 6203.43.35, 6204.61.10, 6204.63.12, 6204.63.30 and 6211.20.15, the term "water resistant" means that garments classifiable in those subheadings must have a water resistance (see ASTM designations D 3600-81 and D 3781-79) such that, under a head pressure of 600 millimeters, not more than 1.0 gram of water penetrates after two minutes when tested in accordance with AATCC Test Method 35-1985. This water resistance must be the result of a rubber or plastics application to the outer shell, lining or inner lining.

Statistical Notes

1. For the purposes of subheadings 6203.21.00, 6203.22.30, 6203.23.00, 6203.29.20, 6204.21.00, 6204.22.30, 6204.23.00 and 6204.29.20, merchandise entered together and classified for customs purposes as an ensemble, shall be reported statistically as separate articles and reported under the most appropriate 10-digit reporting number within the same 8-digit tariff subheading which provides for the ensemble.

2. Certain garments of chapter 62 assembled abroad from components formed and cut in the United States which, after assembly have been subject to bleaching, garment dyeing stone-washing, acid-washing or perma-pressing abroad, may be eligible for entry under a Special Access Program or Special Regime. Eligibility must be established under a bilateral agreement, and entry must be in compliance with procedures established by the Committee for the Implementation of Textile Agreements. The importer is required to identify such garments on the entry summary or withdrawal forms by placing the symbol "H" as a prefix to the appropriate 10-digit chapter 62 tariff number.

3. Certain garments of chapter 62, manufactured (cut and assembled) from fabric formed in the United States, may be eligible for entry under the Outward Processing Program for textiles and apparel. Eligibility must be in compliance with procedures established by the Committee for the Implementation of Textile Agreements (CITA). The importer is required to identify such garments on the entry summary or withdrawal forms by placing the symbol "S" as a prefix to the appropriate 10-digit chapter 62 tariff number.

4. For the purpose of statistical reporting numbers subheadings 6203.43.35.10, 6204.63.3010, 6210.40.5031 and 6210.50.5031, the term "ski/snowboard pants" means ankle-length pants made of synthetic fabrics with or without insulation for cold weather protection, with pockets, at least one of which has a zippered or hook and loop closure, sealed seams at the front (up to the zipper or other means of closure) and back rise, hidden leg sleeves with a means of tightening at the ankle, and with one or more of the following: side openings, scuff guards or reinforcement in the seat. A sealed seam is that is sealed by means of taping, gluing, bonding, cementing, fusing or similar process so that air and water cannot pass through.

   (b) the term "leather" refers to the goods of headings 4107 and 4112 to 4114.

4. Subject to note 3 to this chapter:

4. Provisions of subheading 6406.10 for "formed uppers" cover uppers, with closed bottoms, which have been shaped by lasting, molding or otherwise but not by simply closing at the bottom.

5. For the purposes of determining the constituent material of the outer sole pursuant to note 4(b) of this chapter, no account shall be taken of textile materials which do not possess the characteristics usually required for normal use of an outer sole, including durability and strength.

CHAPTER 69

CERAMIC PRODUCTS

Notes

1. This chapter applies only to ceramic products which have been fired after shaping. Headings 6904 to 6914 apply only to such products other than those classifiable in headings 6901 to 6903.

2. This chapter does not cover:

   (a) Products of heading 2844;

   (b) Articles of heading 6804;

   (c) Articles of chapter 71 (for example, imitation jewelry);

   (d) Cermets of heading 8113;

   (e) Articles of chapter 82;

   (f) Electrical insulators (heading 8546) or fittings of insulating material (heading 8547);

   (g) Artificial teeth (heading 9021);

   (h) Articles of chapter 91 (for example, clocks and clock cases);

   (ij) Articles of chapter 94 (for example, furniture, lamps and lighting fittings, prefabricated buildings);

   (k) Articles of chapter 95 (for example, toys, games and sports equipment);

   (l) Articles of heading 9606 (for example, buttons) or of heading 9614 (for example, smoking pipes); or

   (m) Articles of chapter 97 (for example, works of art).

Additional U.S. Notes

1. For the purposes of headings 6902 and 6903, the term "refractory" is applied to articles which have a pyrometric cone equivalent of at least 1500°C when heated at 60°C per hour (pyrometric cone 18). Refractory articles have special properties of strength and resistance to thermal shock and may also have, depending upon the particular uses for which designed, other special properties such as resistance to abrasion and corrosion.

2. For the purposes of heading 6902, a brick which contains both chromium and magnesium is classifiable according to which of those components (expressed as Cr_2O_3 or MgO, respectively) is the greater by weight.

3. For the purposes of headings 6905, 6907 and 6908, the term "tiles" does not include any article 3.2 cm or more in thickness.

[COMPILER'S NOTE: Former Additional U.S. Note 4 was renumbered as Additional U.S. Note 3]

5. For the purposes of headings 6909 through 6914:

   (a) The terms "porcelain," "china" and "chinaware" embrace ceramic ware (other than stoneware), whether or not glazed or decorated, having a fired white body (unless artificially colored) which will not absorb more than 0.5 percent of its weight of water and is translucent in thicknesses of several millimeters. The term "stoneware" as used in this note, embraces ceramic ware which contains clay as an essential ingredient, is not commonly white, will absorb not more than 3 percent of its weight of water, and is naturally opaque (except in very thin pieces) even when absorption is less than 0.1 percent.

   (b) The term "bone chinaware" embraces chinaware or porcelain the body of which contains 25 percent or more of calcined bone or tricalcium phosphate.

   (c) The term "earthenware" embraces ceramic ware, whether or not glazed or decorated, having a fired body which contains clay as an essential ingredient, and will absorb more than 3 percent of its weight of water.

   (d) The water absorption of a ceramic body shall be determined by ASTM test method designated C373 (except that test specimens may have a minimum weight of 10 g, and may have one large surface glazed).

6. For the purposes of headings 6911 and 6912:

   (a) The term "available in specified sets" embraces plates, cups, saucers and other articles principally used for preparing, serving or storing food or beverages, or food or beverage ingredients, which are sold or offered for sale in the same pattern, but no article is classifiable as being "available in specified sets" unless it is of a pattern in which at least the articles listed below in (b) of this note are sold or offered for sale.

   (b) If each of the following articles is sold or offered for sale in the same pattern, the classification hereunder in subheadings 6911.10.35, 6911.10.37, 6911.10.38, 6912.00.35 or 6912.00.39, of all articles of such pattern shall be governed by the aggregate value of the following articles in the quantities indicated, as determined by the appropriate customs officer under section 402 of the Tariff Act of 1930, as amended, whether or not such articles are imported in the same shipment:

      12 plates of the size nearest to 26.7 cm in maximum dimension, sold or offered for sale,
      12 plates of the size nearest to 15.3 cm in maximum dimension, sold or offered for sale,
      12 tea cups and their saucers, sold or offered for sale,
      12 soups of the size nearest to 17.8 cm in maximum dimension, sold or offered for sale,
      12 fruits of the size nearest to 12.7 cm in maximum dimension, sold or offered for sale,
      1 platter or chop dish of the size nearest to 38.1 cm in maximum dimension, sold or offered for sale,
      1 open vegetable dish or bowl of the size nearest to 25.4 cm in maximum dimension, sold or offered for sale,
      1 sugar of largest capacity, sold or offered for sale,
      1 creamer of largest capacity, sold or offered for sale.

      If either soups or fruits are not sold or offered for sale, 12 cereals of the size nearest to 15.3 cm in maximum dimension, sold or offered for sale, shall be substituted therefor.

   (c) The percentage of water absorption of cast and jiggered ceramic articles of the same pattern, which are "available in specified sets" and which are imported together in a ratio of at least 5 jiggered articles to 1 cast article in the same shipment shall be the average water absorption of such cast and jiggered articles, of the same pattern in the shipment, which average absorption shall be deemed to be equivalent to 5 percent of the water absorption of a representative sample of such cast articles plus 95 percent of the water absorption of a representative sample of such jiggered articles.

7. For the purposes of headings 6911, 6912 and 6913, those provisions which classify merchandise according to the value of each "article," an article is a single tariff entity which may consist of more than one piece. For example, a vegetable dish and its cover, or a beverage pot and its lid, imported in the same shipment, constitute an article.

Statistical Notes

1. For the purposes of headings 6904 and 6905, a "heat insulating" article, whether or not shaped, is one having a specific gravity of 1.2 or less and designed to impede or resist the flow of heat at temperatures above 870°C.

2. For the purposes of heading 6904:

   (a) The term "solid bricks" refers to bricks containing not more than 25 percent voids.

   (b) The term "hollow bricks" refers to bricks containing more than 25 percent voids.

CHAPTER 70

GLASS AND GLASSWARE

Notes

1. This chapter does not cover:

   (a) Goods of heading 3207 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);

   (b) Articles of chapter 71 (for example, imitation jewelry);

   (c) Optical fiber cables of heading 8544, electrical insulators (heading 8546) or fittings of insulating material of heading 8547;

   (d) Optical fibers, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers, hydrometers or other articles of chapter 90;

   (e) Lamps or lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading 9405;

   (f) Toys, games, sports equipment, Christmas tree ornaments or other articles of chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of chapter 95); or

   (g) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of chapter 96.

2. For the purposes of headings 7003, 7004 and 7005:

   (a) Glass is not regarded as "worked" by reason of any process it has undergone before annealing;

   (b) Cutting to shape does not affect the classification of glass in sheets;

   (c) The expression "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infrared light; or which improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.

3. The products referred to in heading 7006 remain classified in that heading whether or not they have the character of articles.

4. For the purposes of heading 7019, the expression "glass wool" means:

   (a) Mineral wools with a silica (SiO_2) content not less than 60 percent by weight;

   (b) Mineral wools with a silica (SiO_2) content less than 60 percent but with an alkaline oxide (K_2O or Na_2O) content exceeding 5 percent by weight or a boric oxide (B_2O_3) content exceeding 2 percent by weight.

   Mineral wools which do not comply with the above specifications fall in heading 6806.

5. Throughout the tariff schedule, the expression "glass" includes fused quartz and other fused silica.

Subheading Note

1. For the purposes of subheadings 7013.22, 7013.33, 7013.41 and 7013.91, the expression "lead crystal" means only glass having a minimum lead monoxide (PbO) content by weight of 24 percent.

XIII
70-2

Additional U.S. Notes

1. For the purposes of this chapter, the term "fused quartz or other fused silica" means glass containing more than 95 percent silica by weight.

2. For the purposes of headings 7003 through 7005, the expression "colored throughout the mass" refers to glass that has a transmittance of normally incident light of less than 66 percent at one or more wavelengths from 400 to 700 millimicrons, inclusive, or a transmittance of less than 80 percent at one or more wavelengths from 525 to 575 millimicrons, inclusive, for glass 6 mm in thickness, or of the equivalent transmittances for any other thickness, provided that, in determining such light transmittances, the effect of surface irregularities or configurations, or of other surface treatment (except flashing applied prior to solidification) and the effect of wire netting within the glass, shall be eliminated.

3. For the purposes of headings 7003 and 7004, glass of the same size and thickness imported in any shipment in quantities over 4.6 m^2 shall be denied entry unless it is--

   (a) Packed in units containing, as nearly as the particular size permits, 4.6 m^2, or multiples thereof; or

   (b) Packed in units containing multiples of the number of sheets of the same size and thickness which would be contained in a unit if packed to contain, as nearly as such size permits, 4.6 or 9.3 m^2; or

   (c) Otherwise packed in a manner which conforms to the packing practices of the domestic glass industry as determined and published from time to time by the Secretary of the Treasury.

4. For the purposes of heading 7005, the expression "polished," as used with reference to glass, refers to glass one or both of the surfaces of which have been made smooth and glossy, in whole or in part, by abrasive or chemical means or by floating the glass over molten metal.

5. For the purposes of subheading 7018.10.20, the term "imitation precious or semiprecious stones" means glass made into shapes suitable for use in jewelry or for other ornamental purposes in a manner similar to natural gemstones, whether or not in imitation thereof, but does not include natural gemstones, synthetic gemstones, reconstructed natural gemstones or imitation pearls.

Statistical Note

1. For the purposes of headings 7003 and 7004, in determining the surface area of cast or rolled glass having irregular surfaces (such as corrugated glass), superficial area shall be used.

SECTION XIV

NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMIPRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELRY; COIN

CHAPTER 71

NATURAL OR CULTURED PEARLS, PRECIOUS OR SEMIPRECIOUS STONES, PRECIOUS METALS, METALS CLAD WITH PRECIOUS METAL, AND ARTICLES THEREOF; IMITATION JEWELRY; COIN

Notes

1. Subject to note 1(a) to section VI and except as provided below, all articles consisting wholly or partly:

   (a) Of natural or cultured pearls or of precious or semiprecious stones (natural, synthetic or reconstructed), or

   (b) Of precious metal or of metal clad with precious metal, are to be classified in this chapter.

2. (a) Headings 7113, 7114 and 7115 do not cover articles in which precious metal or metal clad with precious metal is present as minor constituents only, such as minor fittings or minor ornamentation (for example, monograms, ferrules and rims), and paragraph (b) of the foregoing note does not apply to such articles.

   (b) Heading 7116 does not cover articles containing precious metal or metal clad with precious metal (other than as minor constituents).

3. This chapter does not cover:

   (a) Amalgams of precious metal or colloidal precious metal (heading 2843);

   (b) Sterile surgical suture materials, dental fillings or other goods of chapter 30;

   (c) Goods of chapter 32 (for example, lustres);

   (d) Supported catalysts (heading 3815);

   (e) Articles of heading 4202 or 4203 referred to in note 3(B) to chapter 42;

   (f) Articles of heading 4303 or 4304;

   (g) Goods of section XI (textiles and textile articles);

   (h) Footwear, headgear or other articles of chapter 64 or 65;

   (ij) Umbrellas, walking-sticks or other articles of chapter 66;

   (k) Abrasive goods of heading 6804 or 6805 or chapter 82, containing dust or powder of precious or semiprecious stones (natural or synthetic); articles of chapter 82 with a working part of precious or semiprecious stones (natural, synthetic or reconstructed); machinery, mechanical appliances or electrical goods, or parts thereof, of section XVI. However, articles and parts thereof, wholly of precious or semiprecious stones (natural, synthetic or reconstructed) remain classified in this chapter, except unmounted worked sapphires and diamonds for styli (heading 8522);

   (l) Articles of chapter 90, 91 or 92 (scientific instruments, clocks and watches, musical instruments);

   (m) Arms or parts thereof (chapter 93);

   (n) Articles covered by note 2 to chapter 95;

   (o) Articles classified in chapter 96 by virtue of note 4 to that chapter; or

   (p) Original sculptures or statuary (heading 9703), collectors' pieces (heading 9705) or antiques of an age exceeding one hundred years (heading 9706), other than natural or cultured pearls or precious or semiprecious stones.

4. (a) The expression "precious metal" means silver, gold and platinum.

   (b) The expression "platinum" means platinum, iridium, osmium, palladium, rhodium and ruthenium.

   (c) The expression "precious or semiprecious stones" does not include any of the substances specified in note 2(b) to chapter 96.

5. For the purposes of this chapter, any alloy (including a sintered mixture and an inter-metallic compound) containing precious metal is to be treated as an alloy of precious metal if any one precious metal constitutes as much as 2 percent, by weight, of the alloy. Alloys of precious metal are to be classified according to the following rules:

   (a) An alloy containing 2 percent or more, by weight, of platinum is to be treated as an alloy of platinum;

   (b) An alloy containing 2 percent or more, by weight, of gold but no platinum, or less than 2 percent, by weight, of platinum, is to be treated as an alloy of gold;

   (c) Other alloys containing 2 percent or more, by weight, of silver are to be treated as alloys of silver.

6. Except where the context otherwise requires, any reference in the tariff schedule to precious metal or to any particular precious metal includes a reference to alloys treated as alloys of precious metal or of the particular metal in accordance with the rules in note 5 above, but not to metal clad with precious metal or to base metal or non-metals plated with precious metal.

7. Throughout the tariff schedule the expression "metal clad with precious metal" means material made with a base of metal upon one or more surfaces of which there is affixed by soldering, brazing, welding, hot-rolling or similar mechanical means a covering of precious metal. Except where the context otherwise requires, the expression also covers base metal inlaid with precious metal.

8. Subject to note 1(a) to section VI, goods answering to a description in heading 7112 are to be classified in that heading and in no other heading of the tariff schedule.

9. For the purposes of heading 7113, the expression "articles of jewelry" means:

   (a) Any small objects of personal adornment (for example, rings, bracelets, necklaces, brooches, earrings, watch chains, fobs, pendants, tie pins, cuff links, dress studs, religious or other medals and insignia); and

   (b) Articles of personal use of a kind normally carried in the pocket, in the handbag or on the person (for example, cigar or cigarette cases, snuff boxes, cachou or pill boxes, powder boxes, chain purses or prayer beads).

   These articles may be combined or set, for example, with natural or cultured pearls, precious or semiprecious stones, synthetic or reconstructed precious or semiprecious stones, tortoise shell, mother-of-pearl, ivory, natural or reconstituted amber, jet or coral.

10. For the purposes of heading 7114, the expression "articles of goldsmiths' or silversmiths' wares" includes such articles as ornaments, tableware, toilet-ware, smokers' articles and other articles of household, office or religious use.

11. For the purposes of heading 7117, the expression "imitation jewelry" means articles of jewelry within the meaning of paragraph (a) of note 9 above (but not including buttons or other articles of heading 9606, or dress combs, hair slides or the like, or hairpins, of heading 9615), not incorporating natural or cultured pearls, precious or semiprecious stones (natural, synthetic or reconstructed) nor (except as plating or as minor constituents) precious metal or metal clad with precious metal.

Subheading Notes

1. For the purposes of subheadings 7106.10, 7108.11, 7110.11, 7110.21, 7110.31 and 7110.41, the expressions "powder" and "in powder form" mean products of which 90 percent or more by weight passes through a sieve having a mesh aperture of 0.5 mm.

2. Notwithstanding the provisions of note 4(b), for the purposes of subheadings 7110.11 and 7110.19, the expression "platinum" does not include iridium, osmium, palladium, rhodium or ruthenium.

3. For the classification of alloys in the subheadings of heading 7110, each alloy is to be classified with that metal, platinum, palladium, rhodium, iridium, osmium or ruthenium, which predominates by weight over each other of these metals.

Additional U.S. Notes

1. For the purposes of subchapter II, unless the context otherwise requires:

   (a) The term "unwrought" refers to metals, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, shot and similar manufactured primary forms, but does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping or descaling;

   (b) The term "semimanufactured" refers to wrought metal products in the form of bars, rods, sections, plates, sheets, strips, wire, tubes, pipes and hollow bars, and to powder (other than primary metals in powder form);

   (c) The term "waste and scrap" refers to materials and articles which are second-hand or waste or refuse, or are obsolete, defective or damaged, and which are fit only for the recovery of the metal content or for use in the manufacture of chemicals. It includes residues and ashes of a kind used principally for the recovery of precious metals, but does not include metals in unwrought form or metal-bearing materials provided for in heading 2616.

2. Coin provided for in heading 7118 which is currently in circulation in any country and is imported for monetary purposes shall be admitted without formal customs consumption entry or the payment of duty. This does not affect any requirements under other provisions of law to the effect that transfers of coin into or through the United States, in an amount exceeding $10,000 on any one occasion, shall be reported as described therein.

3. (a) Notwithstanding any provision in additional U.S. note 5 to chapter 91, any article of jewelry provided for in heading 7113 which is the product of the Virgin Islands, Guam, or American Samoa (including any such article which contains any foreign component) shall be eligible for the benefits provided in paragraph (h) of additional U.S. note 5 to chapter 91, subject to the provisions and limitations of that note and of paragraphs (b), (c), and (d) of this note.

   (b) Notwithstanding additional U.S. Note 5(h)(ii)(B) to chapter 91, articles of jewelry subject to this note shall be subject to a limitation of 10,000,000 units.

   (c) Nothing in this note shall result in an increase or a decrease in the aggregate amount referred to in paragraph (h)(iii) of, or the quantitative limitation otherwise established pursuant to the requirements of, additional U.S. note 5 to chapter 91.

   (d) Nothing in this note shall be construed to permit a reduction in the amount available to watch producers under paragraph (h)(iv) of additional U.S. note 5 to chapter 91.

   (e) The Secretary of Commerce and the Secretary of the Interior shall issue such regulations, not inconsistent with the provisions of this note and additional U.S. note 5 to chapter 91, as the Secretaries determine necessary to carry out their respective duties under this note. Such regulations shall not be inconsistent with substantial transformation requirements but may define the circumstances under which articles of jewelry shall be deemed to be 'units' for purposes of the benefits, provisions, and limitations of additional U.S. note 5 to chapter 91.

   (f) Notwithstanding any other provision of law, any article of jewelry provided for in Heading 7113 that is assembled in the Virgin Islands, Guam, or American Samoa by a jewelry manufacturer or jewelry assembler that commenced jewelry manufacturing or jewelry assembly operations in the Virgin Islands, Guam, or American Samoa after August 9, 2001, shall be treated as a product of the Virgin Islands, Guam, or American Samoa for purposes of this note and General Note 3(a)(iv) of this Schedule if such article is entered no later than 18 months after such jewelry manufacturer or jewelry assembler commenced jewelry manufacturing or jewelry assembly operations in the Virgin Islands, Guam, or American Samoa.

4. Prohibition on the importation of certain goods of Burma.

   (a) Pursuant to section 3A of the Burmese Freedom and Democracy Act of 2003 (Public Law 108-61; 50 U.S.C. 1701 note), as amended by the Tom Lantos Block Burmese JADE (Junta's Anti-Democratic Efforts) Act of 2008 (Public Law 110-286), for purposes of goods provided for in headings 7103, 7113 and 7116, except as set forth in subdivisions (c) and (d) of this note, the importation of any of the following goods shall be prohibited:

      (i) jadeite mined in or extracted from Burma and classifiable in heading 7103 of the tariff schedule,

      (ii) rubies mined in or extracted from Burma and classifiable in heading 7103 of the tariff schedule,

      (iii) articles of jewelry containing jadeite described in subdivision (a)(i) of this note, whether classifiable in heading 7113 or 7116 of the tariff schedule; and

Statistical Note

1. For the purposes of subheading 7113.19.50,the expression “ISO standard platinum” means platinum meeting the International Organization for Standardization’s standard for platinum containing at least 85 percent pure platinum or at least 50 percent pure platinum with a combined content of at least 95 percent platinum group metals iridium, osmium, palladium, rhodium, or ruthenium.

2. For the purposes of reporting under statistical numbers 7113.19.5022 through 7113.19.5040, each piece is individually counted. For example, a pair of earrings is counted as two pieces and a necklace and its pendant are counted as one piece.

   (b) Springs and leaves for springs, of base metal, other than clock or watch springs (heading 9114); and

   (c) Articles of heading 8301, 8302, 8308 or 8310 and frames and mirrors, of base metal, of heading 8306.

   In chapters 73 to 76 and 78 to 82 (but not in heading 7315) references to parts of goods do not include references to parts of general use as defined above.

   Subject to the preceding paragraph and to note 1 to chapter 83, the articles of chapter 82 or 83 are excluded from chapters 72 to 76 and 78 to 81.

3. Throughout the schedule, the expression "base metals" means: iron and steel, copper, nickel, aluminum, lead, zinc, tin, tungsten (wolfram), molybdenum, tantalum, magnesium, cobalt, bismuth, cadmium, titanium, zirconium, antimony, manganese, beryllium, chromium, germanium, vanadium, gallium, hafnium, indium, niobium (columbium), rhenium and thallium.

4. Throughout the schedule, the term "cermets" means products containing a microscopic heterogeneous combination of a metallic component and a ceramic component. The term "cermets" includes sintered metal carbides (metal carbides sintered with a metal).

5. Classification of alloys (other than ferroalloys and master alloys as defined in chapters 72 and 74):

   (a) An alloy of base metals is to be classified as an alloy of the metal which predominates by weight over each of the other metals.

   (b) An alloy composed of base metals of this section and of elements not falling within this section is to be treated as an alloy of base metals of this section if the total weight of such metals equals or exceeds the total weight of the other elements present.

   (c) In this section the term "alloys" includes sintered mixtures of metal powders, heterogeneous intimate mixtures obtained by melting (other than cermets) and intermetallic compounds.

6. Unless the context otherwise requires, any reference in the tariff schedule to a base metal includes a reference to alloys which, by virtue of note 5 above, are to be classified as alloys of that metal.

7. Classification of composite articles:

   Except where the headings otherwise require, articles of base metal (including articles of mixed materials treated as articles of base metal under the General Rules of Interpretation) containing two or more base metals are to be treated as articles of the base metal predominating by weight over each of the other metals. For this purpose:

   (a) Iron and steel, or different kinds of iron or steel, are regarded as one and the same metal;

   (b) An alloy is regarded as being entirely composed of that metal as an alloy of which, by virtue of note 5, it is classified; and

   (c) A cermet of heading 8113 is regarded as a single base metal.

8. In this section, the following expressions have the meanings hereby assigned to them:

   (a) Waste and scrap

   Metal waste and scrap from the manufacture or mechanical working of metals, and metal goods definitely not usable as such because of breakage, cutting-up, wear or other reasons.

   (b) Powders

   Products of which 90 percent or more by weight passes through a sieve having a mesh aperture of 1 mm.

Additional U.S. Note

1. For the purposes of this section, the term "unwrought" refers to metal, whether or not refined, in the form of ingots, blocks, lumps, billets, cakes, slabs, pigs, cathodes, anodes, briquettes, cubes, sticks, grains, sponge, pellets, flattened pellets, rounds, rondelles, shot and similar manufactured primary forms, but does not cover rolled, forged, drawn or extruded products, tubular products or cast or sintered forms which have been machined or processed otherwise than by simple trimming, scalping or descaling.

2. For the classification of ferroalloys in the subheadings of heading 7202 the following rule should be observed:

   A ferroalloy is considered as binary and classified under the relevant subheading (if it exists) if only one of the alloy elements exceeds the minimum percentage laid down in chapter note 1(c); by analogy, it is considered respectively as ternary or quaternary if two or three alloy elements exceed the minimum percentage.

CHAPTER 73

ARTICLES OF IRON OR STEEL

Notes

1. In this chapter the expression "cast iron" applies to products obtained by casting in which iron predominates by weight over each of the other elements and which do not comply with the chemical composition of steel as defined in Note 1(d) to chapter 72.

2. In this chapter the word "wire" means hot- or cold-formed products of any cross-sectional shape, of which no cross-sectional dimension exceeds 16 mm.

Additional U.S. Notes

1. For the purposes of heading 7304 or 7306, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.

2. For the purposes of subheading 7307.19.30, the expression "ductile fittings" refers to fittings which contain over 2.5 percent carbon and over 0.02 percent of magnesium or of magnesium and cerium, by weight.

CHAPTER 74

COPPER AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Refined copper

Metal containing at least 99.85 percent by weight of copper; or

Metal containing at least 97.5 percent by weight of copper, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element		Limiting content percent by weight
Ag	Silver	0.25
As	Arsenic	0.5
Cd	Cadmium	1.3
Cr	Chromium	1.4
Mg	Magnesium	0.8
Pb	Lead	1.5
S	Sulfur	0.7
Sn	Tin	0.8
Te	Tellurium	0.8
Zn	Zinc	1
Zr	Zirconium	0.3
Other elements*, each		0.3

* Other elements are, for example, Al, Be, Co, Fe, Mn, Ni, Si.

(b) Copper alloys

Metallic substances other than unrefined copper in which copper predominates by weight over each of the other elements, provided that:

(i) The content by weight of at least one of the other elements is greater than the limit specified in the foregoing table; or

(ii) The total content by weight of such other elements exceeds 2.5 percent.

(c) Master alloys

Alloys containing with other elements more than 10 percent by weight of copper, not usefully malleable and commonly used as an additive in the manufacture of other alloys or as deoxidants, desulfurizing agents or for similar uses in the metallurgy of nonferrous metals. However, copper phosphide (phosphor copper) containing more than 15 percent by weight of phosphorus falls in heading 2848.

(d) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

Wire bars and billets with their ends tapered or otherwise worked simply to facilitate their entry into machines for converting them into, for example, drawing stock (wire rod) or tubes, are, however, to be taken to be unwrought copper of heading 7403.

(e) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(f) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(g) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7403), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7409 and 7410 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(h) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

   (a) Copper-zinc base alloys (brasses)

   Alloys of copper and zinc, with or without other elements. When other elements are present:

   - zinc predominates by weight over each of such other elements;

   - any nickel content by weight is less than 5 percent (see copper-nickel-zinc alloys (nickel silvers)); and

   - any tin content by weight is less than 3 percent (see copper-tin alloys (bronzes)).

   (b) Copper-tin base alloys (bronzes)

   Alloys of copper and tin, with or without other elements. When other elements are present, tin predominates by weight over each of such other elements, except that when the tin content is 3 percent or more the zinc content by weight may exceed that of tin but must be less than 10 percent.

   (c) Copper-nickel-zinc base alloys (nickel silvers)

   Alloys of copper, nickel and zinc, with or without other elements. The nickel content is 5 percent or more by weight (see copper-zinc alloys (brasses)).

   (d) Copper-nickel base alloys

   Alloys of copper and nickel, with or without other elements but in any case containing by weight not more than 1 percent of zinc. When other elements are present, nickel predominates by weight over each of such other elements.

Additional U.S. Note

1. The deduction provided for in additional U.S. note 1 to chapter 26 shall apply to cement copper and copper precipitates of subheading 7401.20.

Statistical Note

l. For the purposes of this chapter, the term "beryllium copper master alloy" refers to master alloys which contain by weight at least 3 percent but not more than 10 percent beryllium.

CHAPTER 75

NICKEL AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

   (a) Bars and rods

   Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

   (b) Profiles

   Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

   (c) Wire

   Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

   (d) Plates, sheets, strip and foil

   Flat-surfaced products (other than the unwrought products of heading 7502), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

   - of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

   - of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or of products of other headings.

   Heading 7506 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or of products of other headings.

   (e) Tubes and pipes

   Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be taken to be tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Notes

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Nickel, not alloyed

Metal containing by weight at least 99 percent of nickel plus cobalt, provided that:

(i) The cobalt content by weight does not exceed 1.5 percent, and

(ii) The content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content percent by weight
Fe Iron	0.5
O Oxygen	0.4
Other elements, each	0.3

(b) Nickel alloys

Metallic substances in which nickel predominates by weight over each of the other elements provided that:

(i) The content by weight of cobalt exceeds 1.5 percent,

(ii) The content by weight of at least one of the other elements is greater than the limit specified in the foregoing table, or

(iii) The total content by weight of elements other than nickel plus cobalt exceeds 1 percent.

2. Notwithstanding the provisions of chapter note 1(c), for the purposes of subheading 7508.10 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

CHAPTER 76

ALUMINUM AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 7601), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Headings 7606 and 7607 apply, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Notes

1. In this chapter the following expressions have the meanings hereby assigned to them:

   (a) Aluminum, not alloyed

   Metal containing by weight at least 99 percent of aluminum, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element	Limiting content percent by weight
Fe + Si (iron plus silicon)	1
Other elements[1], each	0.1[2]

[1] Other elements are, for example, Cr, Cu, Mg, Mn, Ni, Zn.

[2] Copper is permitted in a proportion greater than 0.1 percent but not more than 0.2 percent, provided that neither the chromium nor manganese content exceeds 0.05 percent.

   (b) Aluminum alloys

   Metallic substances in which aluminum predominates by weight over each of the other elements, provided that:

   (i) The content by weight of at least one of the other elements or of iron plus silicon taken together is greater than the limit specified in the foregoing table; or

   (ii) The total content by weight of such other elements exceeds 1 percent.

2. Notwithstanding the provisions of chapter note 1(c), for the purposes of subheading 7616.91 the term "wire" applies only to products, whether or not in coils, of any cross-sectional shape, of which no cross-sectional dimension exceeds 6 mm.

Additional U.S. Note

1. For the purposes of heading 7608, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.

Statistical Notes

l. For the purposes of this chapter, the term "aluminum vanadium master alloy" refers to aluminum alloys which contain by weight 20 percent or more of vanadium.

2. For the purposes of this chapter, the term "aluminum can stock" refers to sheets and strip in coils, of alloys of aluminum in which either manganese or magnesium is the predominant alloying element, not painted, over 0.175 mm but not over 0.432 mm in thickness, and over 254 mm in width, comprising "body stock and "lid stock" as specified below:

   (a) The term "body stock" refers to aluminum can stock having manganese as the predominant alloying element and having a minimum tensile strength of 262 MPa; and

   (b) The term "lid stock" refers to aluminum can stock having magnesium as the predominant alloying element and having a minimum tensile strength of 345 MPa.

CHAPTER 78

LEAD AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

   (a) Bar and rods

   Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

   (b) Profiles

   Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

   (c) Wire

   Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

   (d) Plates, sheets, strip and foil

   Flat-surfaced products (other than the unwrought products of heading 7801), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

   - of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

   - of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

   Heading 7804 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

   (e) Tubes and pipes

   Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note

1. In this chapter the expression "refined lead" means:

   Metal containing by weight at least 99.9 percent of lead, provided that the content by weight of any other element does not exceed the limit specified in the following table:

TABLE - Other elements

Element		Limiting content percent by weight
Ag	Silver	0.02
As	Arsenic	0.005
Bi	Bismuth	0.05
Ca	Calcium	0.002
Cd	Cadmium	0.002
Cu	Copper	0.08
Fe	Iron	0.002
S	Sulfur	0.002
Sb	Antimony	0.005
Sn	Tin	0.005
Zn	Zinc	0.002
Other (for example Te), each		0.001

Statistical Note

1. For the purposes of this chapter, "alloys of lead" are metals in which the lead content is, by weight, less than 99 percent, but not less than any other metallic element.

ZINC AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bar and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

Heading 7905 applies, inter alia, to plates, sheets, strip and foil with patterns (for example, grooves, ribs, checkers, tears, buttons, lozenges) and to such products which have been perforated, corrugated, polished or coated, provided that they do not thereby assume the character of articles or products of other headings.

(e) Tubes and pipes

   (a) Zinc, not alloyed

   Metal containing by weight at least 97.5 percent of zinc.

   (b) Zinc alloys

   Metallic substances in which zinc predominates by weight over each of the other elements, provided that the total content by weight of such other elements exceeds 2.5 percent.

CHAPTER 80

TIN AND ARTICLES THEREOF

Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Bars and rods

Rolled, extruded, drawn or forged products, not in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width. The expression also covers cast or sintered products, of the same forms and dimensions, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(b) Profiles

Rolled, extruded, drawn, forged or formed products, coiled or not, of a uniform cross section along their whole length, which do not conform to any of the definitions of bars, rods, wire, plates, sheets, strip, foil, tubes or pipes. The expression also covers cast or sintered products, of the same forms, which have been subsequently worked after production (otherwise than by simple trimming or descaling), provided that they have not thereby assumed the character of articles or products of other headings.

(c) Wire

Rolled, extruded or drawn products, in coils, which have a uniform solid cross section along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons (including "flattened circles" and "modified rectangles", of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel). Products with a rectangular (including square), triangular or polygonal cross section may have corners rounded along their whole length. The thickness of such products which have a rectangular (including "modified rectangular") cross section exceeds one-tenth of the width.

(d) Plates, sheets, strip and foil

Flat-surfaced products (other than the unwrought products of heading 8001), coiled or not, of solid rectangular (other than square) cross section with or without rounded corners (including "modified rectangles" of which two opposite sides are convex arcs, the other two sides being straight, of equal length and parallel) of a uniform thickness, which are:

- of rectangular (including square) shape with a thickness not exceeding one-tenth of the width,

- of a shape other than rectangular or square, of any size, provided that they do not assume the character of articles or products of other headings.

(e) Tubes and pipes

Hollow products, coiled or not, which have a uniform cross section with only one enclosed void along their whole length in the shape of circles, ovals, rectangles (including squares), equilateral triangles or regular convex polygons, and which have a uniform wall thickness. Products with a rectangular (including square), equilateral triangular or regular convex polygonal cross section, which may have corners rounded along their whole length, are also to be considered as tubes and pipes provided the inner and outer cross sections are concentric and have the same form and orientation. Tubes and pipes of the foregoing cross sections may be polished, coated, bent, threaded, drilled, waisted, expanded, cone-shaped or fitted with flanges, collars or rings.

Subheading Note

1. In this chapter the following expressions have the meanings hereby assigned to them:

(a) Tin, not alloyed

Metal containing by weight at least 99 percent of tin, provided that the content by weight of any bismuth or copper is less than the limit specified in the following table:

TABLE - Other elements

Element	Limiting content percent by weight
Bi Bismuth	0.1
Cu Copper	0.4

(b) Tin alloys

Metallic substances in which tin predominates by weight over each of the other elements, provided that:

(i) The total content by weight of such other elements exceeds 1 percent; or

(ii) The content by weight of either bismuth or copper is equal to or greater than the limit specified in the foregoing table.

Subheading Note

1. Note 1 to chapter 74, defining "bars and rods", "profiles", "wire", and "plates, sheets, strip and foil" applies, mutatis mutandis, to this chapter.

Additional U.S. Notes

1. Alloys of each of the base metals provided for in chapter 81 are metals in which the content of the respective base metal is, by weight, less than 99 percent, but not less than any other metallic element.

2. For the purposes of subheading 8108.90.60, the rate of duty "Free (C)" appearing in the "Special" subcolumn applies only to tubes and pipes with attached fittings, suitable for conducting gases or liquids.

CHAPTER 82

TOOLS, IMPLEMENTS, CUTLERY, SPOONS AND FORKS, OF BASE METAL; PARTS THEREOF OF BASE METAL

Notes

1. Apart from blow torches and similar self-contained torches, portable forges, grinding wheels with frameworks, manicure or pedicure sets, and goods of heading 8209, this chapter covers only articles with a blade, working edge, working surface or other working part of:

   (a) Base metal;

   (b) Metal carbides or cermets;

   (c) Precious or semiprecious stones (natural, synthetic or reconstructed) on a support of base metal, metal carbide or cermet; or

   (d) Abrasive materials on a support of base metal, provided that the articles have cutting teeth, flutes, grooves or the like, of base metal, which retain their identity and function after the application of the abrasive.

2. Parts of base metal of the articles of this chapter are to be classified with the articles of which they are parts, except parts separately specified as such and toolholders for handtools (heading 8466). However, parts of general use as defined in note 2 to section XV are in all cases excluded from this chapter.

   Heads, blades and cutting plates for electric shavers and electric hair clippers are to be classified in heading 8510.

3. Sets consisting of one or more knives of heading 8211 and at least an equal number of articles of heading 8215 are to be classified in heading 8215.

Additional U.S. Notes

1. The provisions in this chapter which specifically refer to kitchen or tableware include articles of types which are used outdoors as well as those which are used indoors.

2. In determining the length of files and rasps (heading 8203), the tang (if any) should not be included.

3. For the purposes of determining the rate of duty applicable to sets provided for in heading 8205, 8206, 8211 or 8215, a specific rate of duty or a compound rate of duty for any article in the set shall be converted to its ad valorem equivalent rate, i.e., the ad valorem rate which, when applied to the full value of the article determined in accordance with section 402 of the Tariff Act of 1930, as amended, would provide the same amount of duties as the specific or compound rate.

Statistical Notes

1. For the purposes of statistical reporting of sets in heading 8205, 8206, 8211 or 8215, the number of pieces reported shall be the total number of separate pieces in the set(s).

2. For the purposes of subheading 8211.92, the term "sheath-type knives" refers to fixed-blade knives contained in a substantial holster, i.e., "sheath" and of a kind used in hunting and fishing.

   (a) Parts which are goods included in any of the headings of chapter 84 or 85 (other than headings 8409, 8431, 8448, 8466, 8473, 8487, 8503, 8522, 8529, 8538 and 8548) are in all cases to be classified in their respective headings;

   (b) Other parts, if suitable for use solely or principally with a particular kind of machine, or with a number of machines of the same heading (including a machine of heading 8479 or 8543) are to be classified with the machines of that kind or in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate. However, parts which are equally suitable for use principally with the goods of headings 8517 and 8525 to 8528 are to be classified in heading 8517;

   (c) All other parts are to be classified in heading 8409, 8431, 8448, 8466, 8473, 8503, 8522, 8529 or 8538 as appropriate or, failing that, in heading 8487 or 8548.

Notes (con.)

3. Unless the context otherwise requires, composite machines consisting of two or more machines fitted together to form a whole and other machines designed for the purpose of performing two or more complementary or alternative functions are to be classified as if consisting only of that component or as being that machine which performs the principal function.

4. Where a machine (including a combination of machines) consists of individual components (whether separate or interconnected by piping, by transmission devices, by electric cables or by other devices) intended to contribute together to a clearly defined function covered by one of the headings in chapter 84 or chapter 85, then the whole falls to be classified in the heading appropriate to that function.

5. For the purposes of these notes, the expression "machine" means any machine, machinery, plant, equipment, apparatus or appliance cited in the headings of chapter 84 or 85.

Additional U.S. Note

1. For the purposes of this section, the term "printed circuit assembly" means goods consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits of heading 8542.

Statistical Note

1. Provisions for semiconductor manufacturing and testing machines and apparatus cover products for the growth and processing of semiconductor materials, such as silicon and gallium arsenide, the processing of such materials into semiconductor devices and the testing of such devices (in general the testing equipment, as well as some of the processing equipment, is classified in chapter 90). More specifically the goods include the following:

   (a) Wafer manufacturing equipment:

      (i) Crystal growers & pullers - used to produce extremely pure monocrystalline semiconductor boules from which wafers can be sliced. Most common methods employed in these crystal growers and pullers are the Czochralski and float zone methods.

      (ii) Wafer preparation equipment:

         (A) Crystal grinders - used to grind the crystal boule to precise diameter required for wafers and to grind the flats on the boule to indicate the conductivity type and resistivity of the crystal.

         (B) Wafer slicing saws - used to slice wafers from a boule of monocrystalline semiconductor material.

         (C) Wafer grinders, lappers and polishers - used to prepare the semiconductor wafer for the fabrication process. This involves bringing the wafer within dimensional tolerances. Especially critical is the flatness of its surface.

   (b) Mask fabrication and repair equipment -

      (i) Fabrication equipment - used to transfer design patterns to a mask or reticle, this equipment generally utilizes optical, electron beam or X-rays to write circuit patterns on photoresist coated substrates. After development, these substrates become the mask or reticle for wafer fabrication.

      (ii) Repair equipment - this equipment generally utilizes focused ion beams or laser beams. They are used directly on the mask or reticle to remove chrome.

   (c) Wafer fabrication equipment:

      (i) Film formation equipment - used to apply or produce various films on the surface of the wafer during the fabrication process. These films serve as conductors, insulators and semiconductors on the finished device. They may include oxides and nitrides of the substrate surface, metals, and epitaxial layers. The processes and equipments listed below are not necessarily limited to the generation of a particular type of film.

         (A) Oxidation furnaces - used to form a "film" of oxide on the wafer. The oxide is formed by the chemical reaction of the top molecular layers of the wafer with the applied oxygen or steam under heat.

         (B) Chemical Vapor Deposition (CVD) equipment - used to deposit various types of films which are obtained by combining the appropriate gases in a reactant chamber at elevated temperatures. This constitutes a thermochemical vapor-phase reaction. Operations may take place at atmospheric or low pressure (LPCVD) and may use plasma enhancement (PECVD).

Statistical Note (con.)

(C) Physical Vapor Deposition (PVD) equipment - used to deposit various types of films which are obtained by vaporizing a solid.

(1) Evaporation equipment - in which the film is generated by heating the source material.

(2) Sputtering equipment - in which the film is generated by bombarding the source material (target) with ions.

(D) Molecular Beam Epitaxy (MBE) equipment - used to grow epitaxial layers on a heated monocrystalline substrate in an ultrahigh vacuum using beams of molecules. The process is similar to PVD.

(ii) Doping equipment - which is used to introduce dopants into the wafer surface in order to modify the conductivity or other characteristics of a semiconductor layer:

(A) Thermal diffusion equipment - in which the dopants introduced into the surface of the wafer by the application of gases under high temperatures.

(B) Ion Implantation - in which the dopants are "driven" into the crystal lattice structure of the surface of the wafer in the form a beam of accelerated ions.

(C) Annealing furnaces - which are used to repair the crystal lattice structures of the wafer damaged by ion implantation.

(iii) Etching and stripping equipment - used for etching or cleaning surfaces of the wafers.

(A) Wet etching equipment - in which chemical etching materials are applied by spraying or immersion. Spray etchers provide more uniform results than bath etchers, since they perform the operation on one wafer at a time.

(B) Dry plasma etching - in which etching materials are presented as gases within a plasma energy field, providing an anisotropic etch profile.

(C) Ion beam milling equipment - in which ionized gas atoms are accelerated toward the wafer surface. The impact results in the top layer being physically removed from the surface.

(D) Strippers or ashers - using techniques similar to etching this apparatus removes the spent photoresist from the surface of the wafer after it has served its purpose as a "stencil". This equipment is also used for removal of nitrides, oxides, and polysilicon, with an isotropic etch profile.

(iv) Lithography equipment - used to transfer the circuit designs to the photoresist coated surface of the semiconductor wafer.

(A) Equipment for coating wafers with photoresist - these include the photoresist spinners which are used to apply liquid photoresist evenly over the surface of the wafer.

(B) Equipment for exposing the photoresist coated wafer with the circuit design (or a part thereof):

(1) Using a mask or reticle and exposing the photoresist to light (generally ultraviolet) or, in some instances, X-rays:

(a) Contact printers - where the mask or reticle is in contact with the wafer during exposure.

(b) Proximity aligners - similar to contact aligners except actual contact does not take place between the mask or reticle and the wafer.

(c) Scanning aligners - which use projection techniques to expose a continuously moving slit across the mask and wafer.

(d) Step and repeat aligners - which use projection techniques to expose the wafer a portion at a time. Exposure can be by reduction from the mask to the wafer or 1:1. Enhancements include the use of an excimer laser.

(2) Direct write on wafer equipment - these apparatus operate with no mask or reticle. They use a computer controlled "writing beam" (such as an electron beam (E-beam), ion beam or laser) to "draw" the circuit design directly on the photoresist coated wafer.

(C) Equipment for developing exposed wafers - these include chemical baths similar to those used in photographic laboratory applications

Statistical Note (con.)

(d) Assembly equipment

(i) Dicing equipment - these include sawing machines and scribing machines (including laser scribers) and dicing accessories such as wafer breaking equipment.

(ii) Die bonding equipment - which installs the die to the package by soldering or gluing

(iii) Wire bonding equipment - used for attaching thin wires or tapes (usually of gold, aluminum or copper) from the die bonding pads to the corresponding pads on the package.

(iv) Packaging equipment - which are used to encapsulate or package a semiconductor device. They include sealing furnaces, lid welders, plastic encapsulation presses, lead trim and form equipment, package deflashers, and tin dip and solder plate equipment.

(e) Testing and inspection equipment

(i) Optical inspection equipment - These include equipment that "examines" portions of the wafer surface and compares them either to a standard pattern or to other portions of the wafer surface.

(ii) Electrical testing equipment - These include computer controlled systems that test the functions and electrical specifications of semiconductor devices through the application and detection of electrical signals or patterns. Testing is performed on both unencapsulated dice and packaged integrated circuits.

Notes (con.)

5. (A) For the purposes of heading 8471, the expression "automatic data processing machines" means machines capable of :

(i) Storing the processing program or programs and at least the data immediately necessary for the execution of the program;

(ii) Being freely programmed in accordance with the requirements of the user;

(iii) Performing arithmetical computations specified by the user; and

(iv) Executing, without human intervention, a processing program which requires them to modify their execution, by logical decision during the processing run.

(B) Automatic data processing machines may be in the form of systems consisting of a variable number of separate units.

(C) Subject to paragraphs (D) and (E) below, a unit is to be regarded as being part of an automatic data processing system if it meets all of the following conditions :

(i) It is of a kind solely or principally used in an automatic data processing system;

(ii) It is connectable to the central processing unit either directly or through one or more other units; and

(iii) It is able to accept or deliver data in a form (codes or signals) which can be used by the system.

Separately presented units of an automatic data processing machine are to be classified in heading 8471.

However, keyboards, X-Y co-ordinate input devices and disk storage units which satisfy the conditions of paragraphs (C) (ii) and (C) (iii) above, are in all cases to be classified as units of heading 8471.

(D) Heading 8471 does not cover the following when presented separately, even if they meet all of the conditions set forth in Note 5 (C) above :

(i) Printers, copying machines, facsimile machines, whether or not combined;

(ii) Apparatus for the transmission or reception of voice, images or other data, including apparatus for communication in a wired or wireless network (such as a local or wide area network);

(iii) Loudspeakers and microphones;

(iv) Television cameras, digital cameras and video camera recorders;

(v) Monitors and projectors, not incorporating television reception apparatus.

(E) Machines incorporating or working in conjunction with an automatic data processing machine and performing a specific function other than data processing are to be classified in the headings appropriate to their respective functions or, failing that, in residual headings.

6. Heading 8482 applies, inter alia, to polished steel balls, the maximum and minimum diameters of which do not differ from the nominal diameter by more than 1 percent or by more than 0.05 mm, whichever is less. Other steel balls are to be classified under heading 7326.

7. A machine which is used for more than one purpose is, for the purposes of classification, to be treated as if its principal purpose were its sole purpose.

Subject to note 2 to this chapter and note 3 to section XVI, a machine the principal purpose of which is not described in any heading or for which no one purpose is the principal purpose is, unless the context otherwise requires, to be classified in heading 8479. Heading 8479 also covers machines for making rope or cable (for example, stranding, twisting or cabling machines) from metal wire, textile yarn or any other material or from a combination of such materials.

8. For the purposes of heading 8470, the term "pocket-size" applies only to machines the dimensions of which do not exceed 170 mm x 100 mm x 45 mm.

9. (A) Notes 8 (a) and 8 (b) to Chapter 85 also apply with respect to the expressions "semiconductor devices" and "electronic integrated circuits", respectively, as used in this Note and in heading 8486. However, for the purposes of this Note and of heading 8486, the expression "semiconductor devices" also covers photosensitive semiconductor devices and light emitting diodes.

   (B) For the purposes of this Note and of heading 8486, the expression "manufacture of flat panel displays" covers the fabrication of substrates into a flat panel. It does not cover the manufacture of glass or the assembly of printed circuit boards or other electronic components onto the flat panel. The expression "flat panel display" does not cover cathode-ray tube technology.

   (C) Heading 8486 also includes machines and apparatus solely or principally of a kind used for :

      (i) the manufacture or repair of masks and reticles;

      (ii) assembling semiconductor devices or electronic integrated circuits;

      (iii) lifting, handling, loading or unloading of boules, wafers, semiconductor devices, electronic integrated circuits and flat panel displays.

   (D) Subject to Note 1 to Section XVI and Note 1 to Chapter 84, machines and apparatus answering to the description in heading 8486 are to be classified in that heading and in no other heading of the tariff schedule.

   (d) Vacuum apparatus of a kind used in medical, surgical, dental or veterinary sciences (heading 9018); or

   (e) Electrically heated furniture of chapter 94.

2. Headings 8501 to 8504 do not apply to goods described in heading 8511, 8512, 8540, 8541 or 8542.

   However, metal tank mercury arc rectifiers remain classified in heading 8504.

3. Heading 8509 covers only the following electromechanical machines of the kind commonly used for domestic purposes:

   (a) Floor polishers, food grinders and mixers, and fruit or vegetable juice extractors, of any weight;

   (b) Other machines provided the weight of such machines does not exceed 20 kg, exclusive of extra interchangeable parts or detachable auxiliary devices.

   The heading does not, however, apply to fans or ventilating or recycling hoods incorporating a fan, whether or not fitted with filters (heading 8414), centrifugal clothes dryers (heading 8421), dishwashing machines (heading 8422), household washing machines (heading 8450), roller or other ironing machines (heading 8420 or 8451), sewing machines (heading 8452), electric scissors (heading 8467) or to electrothermic appliances (heading 8516).

4. For the purposes of heading 8523 :

   (a) "Solid-state non-volatile storage devices" (for example, "flash memory cards" or "flash electronic storage cards") are storage devices with a connecting socket, comprising in the same housing one or more flash memories (for example, "FLASH E²PROM") in the form of integrated circuits mounted on a printed circuit board. They may include a controller in the form of an integrated circuit and discrete passive components, such as capacitors and resistors;

   (b) The term "smart cards" means cards which have embedded in them one or more electronic integrated circuits (a microprocessor, random access memory (RAM) or read-only memory (ROM)) in the form of chips. These cards may contain contacts, a magnetic stripe or an embedded antenna but do not contain any other active or passive circuit elements.

5. For the purposes of heading 8534 "printed circuits" are circuits obtained by forming on an insulating base, by any printing process (for example, embossing, plating-up, etching) or by the "film circuit" technique, conductor elements, contacts or other printed components (for example, inductances, resistors, capacitors) alone or interconnected according to a pre-established pattern, other than elements which can produce, rectify, modulate or amplify an electrical signal (for example, semiconductor elements).

   The term "printed circuits" does not cover circuits combined with elements other than those obtained during the printing process, nor does it cover individual, discrete resistors, capacitors or inductances. Printed circuits may, however, be fitted with non-printed connecting elements.

   Thin- or thick-film circuits comprising passive and active elements obtained during the same technological process are to be classified in heading 8542.

6. For the purpose of heading 8536, "connectors for optical fibres, optical fibre bundles or cables" means connectors that simply mechanically align optical fibres end to end in a digital line system. They perform no other function, such as the amplification, regeneration or modification of a signal.

7. Heading 8537 does not include cordless infrared devices for the remote control of television receivers or other electrical equipment (heading 8543).

Notes (con.)

8. For the purposes of headings 8541 and 8542:

   (a) "Diodes, transistors and similar semiconductor devices" are semiconductor devices the operation of which depends on variations in resistivity on the application of an electric field;

   (b) "Electronic integrated circuits" are:

      (i) Monolithic integrated circuits in which the circuit elements (diodes, transistors, resistors, capacitors, inductances, etc.) are created in the mass (essentially) and on the surface of a semiconductor or compound semiconductor material (for example, doped silicon, gallium arsenide, silicon germanium, iridium phosphide) and are inseparably associated;

      (ii) Hybrid integrated circuits in which passive elements (resistors, capacitors, inductances, etc.), obtained by thin- or thick-film technology, and active elements (diodes, transistors, monolithic integrated circuits, etc.), obtained by semiconductor technology, are combined to all intents and purposes indivisibly, by interconnections of interconnecting cables, on a single insulating substrate (glass, ceramic, etc.). These circuits may also include discrete components;

      (iii) Multichip integrated circuits consisting of two or more interconnected monolithic integrated circuits combined to all intents and purposes indivisibly, whether or not on one or more insulating substrates, with or without leadframes, but with no other active or passive circuit elements.

   For the classification of the articles defined in this note, headings 8541 and 8542 shall take precedence over any other heading in the Nomenclature, except in the case of heading 8523, which might cover them by reference to, in particular, their function.

9. For the purposes of heading 8548, "spent primary cells, spent primary batteries and spent electric storage batteries" are those which are neither usable as such because of breakage, cutting up, wear or other reasons, nor capable of being recharged.

3. For statistical reporting purposes under subheading 8544.70, the unit of quantity "fiber m", as it pertains to optical fiber cables, is determined by multiplying the number of individual fibers contained therein by the length in meters.

4. For statistical reporting purposes in heading 8542 the following definitions will apply:

   (a) The term "static read-write random access (SRAM)" refers to integrated circuit memory devices in which the memory cells may be addressed in any sequence, randomly, for the storage or retrieval of data and in which in which the stored information is retained without further intervention as long as electric power is supplied to the device.

   (b) The term "volatile memory" refers to integrated circuit memory devices which lose all stored information in the absence of electric power.

   (c) The term "dynamic read-write random access (DRAM)" refers to integrated circuit memory devices in which the memory cells may be addressed in any sequence, randomly, for the storage or retrieval of data and in which the stored information must continually be refreshed in order to hold the information in memory.

SECTION XVII

VEHICLES, AIRCRAFT, VESSELS AND
ASSOCIATED TRANSPORT EQUIPMENT

Notes

1. This section does not cover articles of heading 9503 or 9508, or sleds, bobsleds, toboggans or the like of heading 9506.

2. The expressions "parts" and "parts and accessories" do not apply to the following articles, whether or not they are identifiable as for the goods of this section:

   (a) Joints, washers or the like of any material (classified according to their constituent material or in heading 8484) or other articles of vulcanized rubber other than hard rubber (heading 4016);

   (b) Parts of general use, as defined in note 2 to section XV, of base metal (section XV) or similar goods of plastics (chapter 39);

   (c) Articles of chapter 82 (tools);

   (d) Articles of heading 8306;

   (e) Machines or apparatus of headings 8401 to 8479, or parts thereof; articles of heading 8481 or 8482 or, provided they constitute integral parts of engines or motors, articles of heading 8483;

   (f) Electrical machinery or equipment (chapter 85);

   (g) Articles of chapter 90;

   (h) Articles of chapter 91;

   (ij) Arms (chapter 93);

   (k) Lamps or lighting fittings of heading 9405; or

   (l) Brushes of a kind used as parts of vehicles (heading 9603).

3. References in chapters 86 to 88 to "parts" or "accessories" do not apply to parts or accessories which are not suitable for use solely or principally with the articles of those chapters. A part or accessory which answers to a description in two or more of the headings of those chapters is to be classified under that heading which corresponds to the principal use of that part or accessory.

4. For the purposes of this section:

   (a) Vehicles specially constructed to travel on both road and rail are classified under the appropriate heading of chapter 87;

   (b) Amphibious motor vehicles are classified under the appropriate heading of chapter 87;

   (c) Aircraft specially constructed so that they can also be used as road vehicles are classified under the appropriate heading of chapter 88.

5. Air-cushion vehicles are to be classified within this section with the vehicles to which they are most akin as follows:

   (a) In chapter 86 if designed to travel on a guide-track (hovertrains);

   (b) In chapter 87 if designed to travel over land or over both land and water;

   (c) In chapter 89 if designed to travel over water, whether or not able to land on beaches or landing-stages or also able to travel over ice.

   Parts and acessories of air-cushion vehicles are to be classified in the same way as those of vehicles of the heading in which the air-cushion vehicles are classified under the above provisions.

   Hovertrain track fixtures and fittings are to be classified as railway track fixtures and fittings, and signalling, safety or traffic control equipment for hovertrain transport systems as signalling, safety or traffic control equipment for railways.

CHAPTER 86

   (a) Assembled track, turntables, platform buffers, loading gauges;

   (b) Semaphores, mechanical signal discs, level crossing control gear, signal and point controls, and other mechanical (including electro-mechanical) signaling, safety or traffic control equipment, whether or not fitted for electric lighting, for railways, tramways, roads, inland waterways, parking facilities, port installations or airfields.

Additional U.S. Note

1. Railway locomotives (provided for in headings 8601 and 8602) and railway freight cars (provided for in heading 8606) on which no duty is owed are not subject to the entry or release requirements for imported merchandise set forth in Sections 448 and 484 of the Tariff Act of 1930. The Secretary of the Treasury may by regulation establish appropriate reporting requirements, including the requirement that a bond be posted to ensure compliance.

CHAPTER 87

VEHICLES OTHER THAN RAILWAY OR TRAMWAY ROLLING-STOCK, AND PARTS AND ACCESSORIES THEREOF

Notes

1. This chapter does not cover railway or tramway rolling-stock designed solely for running on rails.

2. For the purposes of this chapter, "tractors" means vehicles constructed essentially for hauling or pushing another vehicle, appliance or load, whether or not they contain subsidiary provision for the transport, in connection with the main use of the tractor, of tools, seeds, fertilizers or other goods.

   Machines and working tools designed for fitting to tractors of heading 8701 as interchangeable equipment remain classified in their respective headings even if presented with the tractor, and whether or not mounted on it.

3. Motor chassis fitted with cabs fall in headings 8702 to 8704, and not in heading 8706.

4. Heading 8712 includes all children's bicycles. Other children's cycles fall in heading 9503.

Additional U.S. Notes

1. Road tractors, trailers and semi-trailers remain separately classified in headings 8701 and 8716, respectively, even when entered together.

2. For the purposes of classifying bicycles under the provisions therefore in heading 8712, the diameter of each wheel is the diameter measured to the outer circumference of the tire which is mounted thereon or, if none is mounted thereon, of the usual tire for such wheel.

   (b) Supporting belts or other support articles of textile material, whose intended effect on the organ to be supported or held derives solely from their elasticity (for example, maternity belts, thoracic support bandages, abdominal support bandages, supports for joints or muscles) (section XI);

   (c) Refractory goods of heading 6903; ceramic wares for laboratory, chemical or other technical uses, of heading 6909;

   (d) Glass mirrors, not optically worked, of heading 7009, or mirrors of base metal or of precious metal, not being optical elements (heading 8306 or chapter 71);

   (e) Goods of heading 7007, 7008, 7011, 7014, 7015 or 7017;

   (b) Automatic regulators of electrical quantities, and instruments or apparatus for automatically controlling non-electrical quantities the operation of which depends on an electrical phenomenon varying according to the factor to be controlled, which are designed to bring this factor to, and maintain it at, a desired value, stabilized against disturbances, by constantly or periodically measuring its actual value.

Additional U.S. Notes

1. For the purposes of headings 9001 and 9002, the term "optically worked" refers to glass the surface of which has been ground or polished in order to produce the required optical properties.

2. For the purposes of this chapter, the term "electrical" when used in reference to instruments, appliances, apparatus and machines, refers to those articles the operation of which depends on an electrical phenomenon which varies according to the factor to be ascertained.

3. For the purposes of this chapter, the terms "optical appliances" and "optical instruments" refer only to those appliances and instruments which incorporate one or more optical elements, but do not include any appliances or instruments in which the incorporated optical element or elements are solely for viewing a scale or for some other subsidiary purpose.

4. For the purposes of this chapter, the term "printed circuit assembly" means goods consisting of one or more printed circuits of heading 8534 with one or more active elements assembled thereon, with or without passive elements. For the purposes of this note, "active elements" means diodes, transistors and similar semiconductor devices, whether or not photosensitive, of heading 8541, and integrated circuits of heading 8542.

Statistical Notes

1. For statistical reporting purposes under subheading 9001.10, the unit of quantity "fiber m", as it pertains to optical fiber bundles and cables, is determined by multiplying the number of individual fibers contained therein by the length in meters.

CHAPTER 91

CLOCKS AND WATCHES AND PARTS THEREOF

Notes

1. This chapter does not cover:

   (a) Clock or watch glasses or weights (classified according to their constituent material);

   (b) Watch chains (heading 7113 or 7117, as the case may be);

   (c) Parts of general use defined in note 2 to section XV, of base metal (section XV), or similar goods of plastics (chapter 39) or of precious metal or metal clad with precious metal (generally heading 7115); clock or watch springs are, however, to be classified as clock or watch parts (heading 9114);

   (d) Bearing balls (heading 7326 or 8482, as the case may be);

   (e) Articles of heading 8412 constructed to work without an escapement;

   (f) Ball bearings (heading 8482); or

   (g) Articles of chapter 85, not yet assembled together or with other components into watch or clock movements or into articles suitable for use solely or principally as parts of such movements (chapter 85).

2. Heading 9101 covers only watches with case wholly of precious metal or of metal clad with precious metal, or of the same materials combined with natural or cultured pearls, or precious or semiprecious stones (natural, synthetic or reconstructed) of headings 7101 to 7104. Watches with case of base metal inlaid with precious metal fall in heading 9102.

3. For the purposes of this chapter, the expression "watch movements" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such watch movements shall not exceed 12 mm in thickness and 50 mm in width, length or diameter.

4. Except as provided in note 1, movements and other parts suitable for use both in clocks or watches and in other articles (for example, precision instruments) are to be classified in this chapter.

Additional U.S. Notes

1. For the purposes of this chapter:

   (a) The term "watches" embraces timepieces (including timepieces having special features, such as chronographs, calendar watches and watches designed for use in skin diving) of a kind for wearing or carrying on the person whether or not the movement contained therein conforms to the definition of "watch movements" in note 3, above. Timepieces incorporating a stand, however simple, are not classifiable as watches.

   (b) The term "cases" embraces inner and outer cases, containers and housings for movements, together with parts or pieces, such as, but not limited to, rings, feet, posts, bases and outer frames, and any auxiliary or incidental features, which (with appropriate movements) serve to complete the watches, clocks, time switches and other apparatus provided for in this chapter.

   (c) The term "jewels" includes substitutes for jewels.

   (d) The term "clock movements" means devices regulated by a balance wheel and hairspring, quartz crystal or any other system capable of determining intervals of time, with a display or a system to which a mechanical display can be incorporated. Such clock movements shall either exceed 12 mm in thickness or 50 mm in width, length or diameter, or both.

   (e) The term "complete watch or clock movements, unassembled or partly assembled (movement sets)" refers to sets which consist of all parts necessary to assemble a watch or clock movement, except that for movements having mechanical displays the set may or may not include the dial and hands.

Additional U.S. Notes (con.)

(f) The term "incomplete watch or clock movements, assembled" refers to:

(I) Mechanical movements which are mounted but lack certain parts other than the dial, hands or winding spindle (e.g., the escapement or the barrel bridge);

(ii) Battery powered movements with mechanical displays which are mounted but lack certain parts other than the dial, hands, setting spindle or battery (e.g., the motor); or

(iii) Other movements intended to operate with opto-electronic displays which are mounted but lack certain parts other than the battery (e.g., the display).

(g) The term "rough watch or clock movements" refers to sets of unassembled parts for the assembly of watch or clock movements of a kind constructed to work with an escapement. These sets do not include escapement, balance wheel and hairspring or other regulating device, mainspring, dial or hands; they therefore consist mainly of the base plate (and any additional plates), bridges, train, motion work, winding and setting mechanism and any additional mechanisms such as automatic winding device, calendar mechanisms, chronograph, alarm, etc. These sets may be entered with or without a barrel. Each element, intended for use as it is, may itself consist of one simple piece or of several parts fitted inseparably together, but such elements may not themselves be assembled to each other.

2. Watch straps, watch bands and watch bracelets entered with wrist watches and of a kind normally sold therewith, whether or not attached, are classified with the watch in heading 9101 or 9102. Otherwise, watch straps, watch bands and watch bracelets shall be classified in heading 9113.

3. Batteries entered with battery powered watches or clocks, or with the complete, assembled movements thereof, and intended for use therewith, are classifiable under the provision for the watch, clock or movement. Similarly, batteries entered with a complete watch or clock movement, unassembled or partly assembled (movement set) or with an incomplete watch or clock movement, assembled, and intended for use therewith, are classifiable under the provision for such movement. Batteries are otherwise classifiable in heading 8506 or 8507, whether or not suitable for use with watches or clocks.

4. Special Marking Requirements: With the following exceptions, any movement or case provided for in this chapter, whether imported separately or attached to an article provided for in this chapter, shall not be permitted to be entered unless conspicuously and indelibly marked by cutting, die-sinking, engraving, stamping (including by means of indelible ink), or mold-marking (either indented or raised), as specified below. Movements with opto-electronic display only and cases designed for use therewith, whether entered as separate articles or as components of assembled watches or clocks, are excepted from the marking requirements set forth in this note. The special marking requirements are as follows:

(a) Watch movements shall be marked on one or more of the bridges or top plates to show:

(i) the name of the country of manufacture;

(ii) the name of the manufacturer or purchaser; and

(iii) in words, the number of jewels, if any, serving a mechanical purpose as frictional bearings.

(b) Clock movements shall be marked on the most visible part of the front or back plate to show:

(i) the name of the country of manufacture;

(ii) the name of the manufacturer or purchaser; and

(iii) the number of jewels, if any.

(c) Watch cases shall be marked on the inside or outside of the back to show:

(i) the name of the country of manufacture; and

(ii) the name of the manufacturer or purchaser.

(d) Clock cases provided for in this chapter shall be marked on the most visible part of the outside of the back to show the name of the country of manufacture.

Additional U.S. Notes (con.)

5. Products of Insular Possessions

(a) Except as provided in paragraphs (b) through (ij) of this note, any article provided for in this chapter which is the product of the Virgin Islands, Guam and American Samoa (hereinafter referred to as the "insular possessions") and which contains any foreign component shall be subject to duty:

(i) At the rates set forth in column 1, if the countries of origin of more than 50 percent in value of the foreign components are countries to products of which column 1 rates apply; and

(ii) At the rates set forth in column 2, if the countries of origin of 50 percent or more in value of the foreign components are countries to products of which column 2 rates apply.

(b) Watch movements and watches (including watch straps, watch bands, and watch bracelets assembled onto watches) that are produced or manufactured in a United States insular possession which contain any foreign component may be admitted free of duty without regard to the value of the foreign materials such watches contain if they conform with the provisions of this note, but the total quantity of such articles entered free of duty shall not exceed the amounts established by or pursuant to paragraph (d) of this note.

(c) Notwithstanding the provisions of paragraph (b) of this note, the provisions of this note and the benefits thereunder shall not apply to any article containing any material which is the product of any country with respect to which column 2 rates of duty apply.

(d) (i) In calendar year 1983 the total quantity of such articles which may be entered free of duty shall not exceed 4,800,000 units.

(ii) In subsequent calendar years, the Secretary of Commerce and the Secretary of the Interior (hereinafter referred to as the "Secretaries"), acting jointly, shall establish a limit on the quantity which may be entered free of duty during the calendar year, and shall consider whether such limit is in the best interest of the insular possessions and not inconsistent with domestic or international trade policy considerations. The quantity the Secretaries establish in any calendar year under this paragraph shall not--

(A) exceed 10,000,000 units or one-ninth of apparent domestic consumption (as determined by the International Trade Commission pursuant to paragraph (e) of this note), whichever is greater;

(B) be decreased by more than 10 percent of the quantity established for the immediately preceding calendar year; and

(C) be increased to more than 7,000,000 units or by more than 20 percent of the quantity established for the immediately preceding calendar year, whichever is greater.

(e) On or before April 1 of each calendar year (beginning with the first year in which watch imports from the United States insular possessions exceed 9,000,000 units), the International Trade Commission shall determine the apparent United States consumption of watches and watch movements during the preceding calendar year, shall report such determination to the Secretaries, and shall publish such determination in the Federal Register.

(f) (i) In calendar year 1983, not more than 3,000,000 units of the total quantity of articles described in paragraph (d) which may be entered free of duty shall be the product of the Virgin Islands, not more than 1,200,000 units shall be the product of Guam, and not more than 600,000 units shall be the product of American Samoa.

(ii) For calendar year 1984 and thereafter, the Secretaries may establish new territorial shares of the total amount which may be entered free of duty, taking into account the capacity of each territory to produce and ship its assigned amounts. A territory's share in any year shall not be reduced:

(A) by more than 200,000 units in calendar year 1984 or 1985; and

(B) by more than 500,000 units in calendar year 1986 or thereafter, except that no territorial share shall be established at less than 500,000 units.

(g) The Secretaries, acting jointly, shall allocate the calendar year duty exemptions provided by paragraphs (b), (d) and (f) of this note on a fair and equitable basis among producers located in the insular possessions, and shall issue appropriate licenses thereof. Allocations made by the Secretaries shall be final. In making the allocations, the Secretaries shall consider the potential impact of territorial production on domestic production of like articles and shall establish allocation criteria (including minimum assembly requirements) that will reasonably maximize the net amount of direct economic benefits to the insular possessions.

Additional U.S. Notes (con.)

(h) (i) In the case of each of calendar years 2003 through 2015, the Secretaries jointly, shall—

(A) verify—

(1) the wages paid by each producer to permanent residents of the insular possessions during the preceding calendar year (including the value of usual and customary health insurance, life insurance, and pension benefits); and

(2) the total quantity and value of watches and watch movements produced in the insular possessions by that producer and imported free of duty into the customs territory of the United States; and

(B) issue to each producer (not later than 60 days after the end of the preceding calendar year) a certificate for the applicable amount.

(ii) For purposes of subparagraph (i), except as provided in subparagraphs (iii) and (iv), the term 'applicable amount' means an amount equal to the sum of—

(A) 90 percent of the producer's creditable wages (including the value of usual and customary health insurance, life insurance, and pension benefits) on the assembly during the preceding calendar year of the first 300,000 units; plus

(B) the applicable graduated declining percentage (determined each year by the Secretaries) of the producer's creditable wages (including the value of usual and customary health insurance, life insurance, and pension benefits) on the assembly during the preceding calendar year of units in excess of 300,000 but not in excess of 750,000; plus

(C) the difference between the duties that would have been due on each producer's watches and watch movements (excluding digital watches and excluding units in excess of the 750,000 limitation of this subparagraph) imported into the customs territory of the United States free of duty during the preceding calendar year if the watches and watch movements had been subject to duty at the rates set forth in column 1 under this chapter that were in effect on January 1, 2001, and the duties that would have been due on the watches and watch movements if the watches and watch movements had been subject to duty at the rates set forth in column 1 under this chapter that were in effect for such preceding calendar year.

(iii) The aggregate amount of all certificates which are issued during any calendar year shall not exceed an amount which bears the same ratio to $5,000,000 as:

(A) the gross national product of the United States (as determined by the Secretary of Commerce) for the preceding calendar year, bears to:

(B) the gross national product of the United States (as so determined) for 1982.

(iv) (A) Subject to the provision of clause (B), if the amount of the certificates issued under subparagraph (I) would exceed the limit under subparagraph (iii), the applicable amount of each producer's certificate shall be reduced proportionately by the amount of such excess.

(B) The applicable amount of any producer's certificate shall not be reduced below the amount determined under subparagraph (ii)(A), except that if the application of this clause would result in the aggregate amount of the certificates exceeding the limit under subparagraph (iii), the applicable amount of each producer's certificate shall again be reduced proportionately by the amount of the excess determined after application of this clause.

(v) Any certificate issued under subparagraph (i) shall entitle the certificate holder to secure a refund of duties equal to the face value of the certificate on any articles that are imported into the customs territory of the United States by the certificate holder. Such refunds shall be made under regulations issued by the Treasury Department. Not more than 5 percent of such refunds may be retained as a reimbursement to the Customs Service for the administrative costs of making the refunds.

(vi) Any certificate issued under subparagraph (I), or any portion thereof, shall be negotiable.

(vii) Any certificate issued under subparagraph (I) shall expire 1 year from the date of issuance and may be applied against duties on imports of watches and watch movements the entry of which were made within 2 years prior to the date of issuance of the certificate.

(viii) For purposes of determining the applicable amount of any producer's certificate to be issued during calendar year 1983, the greater of:

(A) the producer's creditable wages for calendar year 1982; or

(B) 60 percent of the producer's creditable wages for calendar year 1981 shall be considered the creditable wages for calendar year 1982.

(ij) the Secretaries are authorized to issue such regulations, not inconsistent with the provisions of this note, as they determine necessary to carry out their respective duties under this note. Such regulations shall include minimum assembly requirements. Any duty-free entry determined not to have been made in accordance with applicable regulations shall be subject to the applicable civil remedies and criminal sanctions, and, in addition, the Secretaries may cancel or restrict the license or certificate of any manufacturer found in willful violation of the regulations.

Statistical Notes

1. The calculation of duties on various watches, clocks, watch movements and clock movements requires that these articles be constructively separated into their component parts and each component separately valued. The individual components shall be separately reported under the statistical suffixes show below. In each instance the sum of the values of the individual components shall be equal to the total value of the article. In those instances where the components of an article are to be separately reported under the following reporting scheme, the entry should include all the individually named components even if not included in the shipment. In such instance the entered quantity and value would be zero. For example, entry of a battery powered watch, imported without a battery, classifiable under subheading 9101.11.40 would include a line for the statistical reporting number for the battery (9101.11.4040) with the quantity and value shown as zero. To determine the proper statistical reporting number(s) for the subheadings enumerated below, the importer shall combine the applicable 8-digit subheading number with the applicable statistical suffix found below.

Statistical Notes

1. For statistical reporting purposes under subheading 9201.10, the height of an upright piano case is determined by measuring from the floor to the top of the back of the case.

2. For statistical reporting purposes under subheading 9201.20, the length of a grand piano case is determined by measuring perpendicularly from the front edge of the cabinet in front of the keys to the farthest point at the center of the grand rim tail.

Subheading Note

1. Subheading 9504.50 covers:

   (a) Video game consoles from which the image is reproduced on a television receiver, a monitor or other external screen or surface; or

   This subheading does not cover video game consoles or machines operated by coins, banknotes, bank cards, tokens or by any other means of payment (subheading 9504.30).

Statistical note

1. In heading 9503, classification is based on the youngest age for which the product is intended. For example, an item labeled “For ages 2–5" would be appropriately classified in the “Under 3 years of age” category. Parts and accessories, if not specifically labeled for a specific age, should be classified under the age designation that would be applicable to the finished retail product of which it is a component or in which it is incorporated.

CHAPTER 97

WORKS OF ART, COLLECTORS' PIECES AND ANTIQUES

Notes

1. This chapter does not cover:

   (a) Unused postage or revenue stamps, postal stationery (stamped paper) or the like, of heading 4907;

   (b) Theatrical scenery, studio backdrops or the like, of painted canvas (heading 5907) except if they may be classified in heading 9706; or

   (c) Pearls, natural or cultured, or precious or semiprecious stones (headings 7101 to 7103).

2. For the purposes of heading 9702, the expression "original engravings, prints and lithographs" means impressions produced directly, in black and white or in color, of one or of several plates wholly executed by hand by the artist, irrespective of the process or of the material employed by him, but not including any mechanical or photomechanical process.

3. Heading 9703 does not apply to mass-produced reproductions or works of conventional craftsmanship of a commercial character, even if these articles are designed or created by artists.

4. (a) Subject to notes 1 through 3 above, articles of this chapter are to be classified in this chapter and not in any other chapter of the tariff schedule.

   (b) Heading 9706 does not apply to articles of the preceding headings of this chapter.

5. Frames around paintings, drawings, pastels, collages or similar decorative plaques, engravings, prints or lithographs are to be classified with those articles, provided they are of a kind and of a value normal to those articles. Frames which are not of a kind or of a value normal to the articles referred to in this note are to be classified separately.

Additional U.S. Notes

1. Heading 9703 covers not only original sculpture made by the sculptor, but also the first 12 castings, replicas or reproductions made from a sculptor's original work or model, by the sculptor himself or by another artist, with or without a change in scale and whether or not the sculptor is alive at the time the castings, replicas or reproductions are completed.

2. Whenever an article is entered for sale under heading 9706, and thereafter determined to be not over 100 years of age, a duty of 6.6 percent ad valorem for articles subject to column 1-general treatment, free of duty for goods originating in the territory of Canada or a duty of 25 percent ad valorem for articles subject to column 2 treatment shall be assessed thereon in addition to any other duty or penalty imposed on such article under the tariff schedule.

CHAPTER 98

SPECIAL CLASSIFICATION PROVISIONS

U.S. Notes

1. The provisions of this chapter are not subject to the rule of relative specificity in general rule of interpretation 3(a). Any article which is described in any provision in this chapter is classifiable in said provision if the conditions and requirements thereof and of any applicable regulations are met.

2. In the absence of a specific provision to the contrary, the tariff status of an article is not affected by the fact that it was previously imported into the customs territory of the United States and cleared through customs whether or not duty was paid upon such previous importation.

3. Any article exempted under subchapters IV through VII, inclusive, or subchapter IX from the payment of duty shall be exempt also from the payment of any internal-revenue tax imposed upon or by reason of importation.

Statistical Notes

1. Statistical data are not to be furnished with respect to articles classified in those headings of this chapter for which no statistical suffix is shown.

2. For articles provided for in this chapter, the rate of duty for which is derived from a provision elsewhere in the tariff schedule, the citation to be used in statistical reporting shall be the 10-digit statistical reporting number provided in this chapter followed by the reporting number of the provision from which such rate is derived. The unit of quantity reported hereunder for such articles shall be the same as the unit of quantity for the provision from which the rate was derived. For example, 10 new fully automatic arc welding machines exported for repairs or alterations pursuant to a warranty and returned to the United States the statistical reporting number shall be 9802.00.4040-8515.31.0000, with the quantity being shown as 10 and the value as dutiable value.

9802.00.4

NOTICE TO EXPORTERS

The statistical reporting numbers contained in this chapter apply only to imports and may not be reported on Shipper's Export Declarations. See Notice to Exporters preceding chapter 1.

SUBCHAPTER I

ARTICLES EXPORTED AND RETURNED, NOT ADVANCED OR
IMPROVED IN CONDITION; ANIMALS EXPORTED AND RETURNED

U.S. Notes

1. The provisions in this subchapter (except subheadings 9801.00.70 and 9801.00.80) shall not apply to any article:

   (a) Exported with benefit of drawback;

   (b) Of a kind with respect to the importation of which an internal-revenue tax is imposed at the time such article is entered, unless such article was subject to an internal-revenue tax imposed upon production or importation at the time of its exportation from the United States and it shall be proved that such tax was paid before exportation and was not refunded; or

   (c) Manufactured or produced in the United States in a customs bonded warehouse or under heading 9813.00.05 and exported under any provision of law.

2. For the purposes of subheadings 9801.00.70 and 9801.00.80:

   (a) When because of the destruction of customs records or for other cause it is impracticable to establish whether drawback was allowed, or the amount allowed, on a returned article, there shall be assessed thereon an amount of duty equal to the estimated drawback and internal-revenue tax which would be allowable or refundable if the imported merchandise used in the manufacture or production of the returned article were dutiable or taxable at the rate applicable to such merchandise on the date of entry, but in no case more than the duty and tax that would apply if the article were wholly of foreign origin;

   (b) Tobacco products and cigarette papers and tubes classifiable under such subheading may be released from customs custody, without payment of that part of duty attributable to the internal-revenue tax, for return to internal-revenue bond as provided by section 5704(d) of the Internal Revenue Code of 1954; and

   (c) In order to facilitate the ascertainment and collection of the duty provided for, the Secretary of the Treasury is authorized to ascertain and specify the amounts of duty equal to drawback or internal-revenue tax which shall be applied to articles or classes or kinds of articles, and to exempt from the assessment of duty articles or classes or kinds of articles with respect to which the collection of such duty involves expense and inconvenience to the Government which is disproportionate to the probable amount of such duty.

SUBCHAPTER II

ARTICLES EXPORTED AND RETURNED, ADVANCED OR IMPROVED ABROAD

U.S. Notes

1. Except for goods subject to NAFTA drawback, this subchapter shall not apply to any article exported:

   (a) From continuous customs custody with remission, abatement or refund of duty;

   (b) With benefit of drawback;

   (c) To comply with any law of the United States or regulation of any Federal agency requiring exportation; or

   (d) After manufacture or production in the United States under heading 9813.00.05.

2. (a) Except as provided in paragraph (b), any product of the United States which is returned after having been advanced in value or improved in condition abroad by any process of manufacture or other means, or any imported article which has been assembled abroad in whole or in part of products of the United States, shall be treated for the purposes of this Act as a foreign article, and, if subject to a duty which is wholly or partly ad valorem, shall be dutiable, except as otherwise prescribed in this part, on its full value determined in accordance with section 402 of the Tariff Act of 1930, as amended. If such product or such article is dutiable at a rate dependent upon its value, the value for the purpose of determining the rate shall be its full value under the said section 402.

   (b) No article (except a textile article, apparel article, or petroleum, or any product derived from petroleum, provided for in heading 2709 or 2710) may be treated as a foreign article, or as subject to duty, if--

      (i) the article is--

         (A) assembled or processed in whole of fabricated components that are a product of the United States, or

         (B) processed in whole of ingredients (other than water) that are a product of the United States,

         in a beneficiary country; and

      (ii) neither the fabricated components, materials or ingredients, after exportation from the United States, nor the article itself, before importation into the United States, enters the commerce of any foreign country other than a beneficiary country.

   As used in this paragraph, the term "beneficiary country" means a country listed in general note 7(a).

3. Articles repaired, altered, processed or otherwise changed in condition abroad.--The following provisions apply only to subheadings 9802.00.40 through 9802.00.60, inclusive:

   (a) The value of repairs, alterations, processing or other change in condition outside the United States shall be:

      (i) The cost to the importer of such change; or

      (ii) If no charge is made, the value of such change,

      as set out in the invoice and entry papers; except that, if the appraiser concludes that the amount so set out does not represent a reasonable cost or value, then the value of the change shall be determined in accordance with section 402 of the Tariff Act of 1930, as amended.

   (b) No appraisement of the imported article in its changed condition shall be required unless necessary to a determination of the rate or rates of duty applicable to such article.

   (c) The duty, if any, upon the value of the change in condition shall be at the rate which would apply to the article itself, as an entirety without constructive separation of its components, in its condition as imported if it were not within the purview of this subchapter. If the article, as returned to the United States, is subject to a specific or compound rate of duty, such rate shall be converted to the ad valorem rate which when applied to the full value of such article determined in accordance with said section 402 would provide the same amount of duties as the specific or compound rate. In order to compute the duties due, the ad valorem rate so obtained shall be applied to the value of the change in condition made outside the United States.

   (d) For the purposes of subheadings 9802.00.40 and 9802.00.50, the rates of duty in the "Special" subcolumn of column 1 followed by the symbol "CA" or "MX" in parentheses shall apply to any goods which are returned to the United States after having been repaired or altered in Canada or in Mexico, respectively, whether or not such goods are goods of Canada or goods of Mexico under the terms of general note 12 to the tariff schedule.

U.S. Notes (con.)

(e) For purposes of subheading 9802.00.60, the term "metal" covers (1) the base metals enumerated in note 3 to section XV; (2) arsenic, barium, boron, calcium, mercury, selenium, silicon, strontium, tellurium, thorium, uranium and the rare-earth elements; and (3) alloys of any of the foregoing.

4. Articles assembled abroad with components produced in the United States.--The following provisions apply only to headings 9802.00.80 and 9802.00.90:

(a) The value of the products of the United States assembled into the imported article shall be:

(i) The cost of such products at the time of the last purchase; or

(ii) If no charge is made, the value of such products at the time of the shipment for exportation,

as set out in the invoice and entry papers; except that, if the appraiser concludes that the amount so set out does not represent a reasonable cost or value, then the value of such products shall be determined in accordance with section 402 of the Tariff Act of 1930, as amended.

(b) The duty, if any, on the imported article shall be at the rate which would apply to the imported article itself, as an entirety without constructive separation of its components, in its condition as imported if it were not within the purview of this subchapter. If the imported article is subject to a specific or compound rate of duty, the total duties shall be reduced in such proportion as the cost or value of such products of the United States bears to the full value of the imported article.

5. No imported article shall be accorded partial exemption from duty under more than one provision in this subchapter.

6. Notwithstanding the partial exemption from ordinary customs duties on the value of the metal product exported from the United States provided under subheading 9802.00.60, articles imported under subheading 9802.00.60 are subject to all other duties, and any other restrictions or limitations, imposed pursuant to title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.), or chapter 1 of title II or chapter 1 of title III of the Trade Act of 1974 (19 U.S.C. 2251 et seq., 19 U.S.C. 2411 et seq.).

U.S. Notes (con.)

7. (a) For purposes of the special tariff treatment authorized by the African Growth and Opportunity Act (AGOA) (title I of Pub.L. No. 106-200) for certain goods of heading 9802.00.80 imported directly from those beneficiary sub-Saharan African countries previously designated by proclamation that are subsequently enumerated in a notice published in the Federal Register by the United States Trade Representative (USTR) as having been determined to have satisfied the requirements of the AGOA and therefore to be afforded such tariff treatment, the duty-free treatment indicated for such heading shall apply only to apparel articles sewn or otherwise assembled in one or more such beneficiary countries from fabrics wholly formed and cut, or from components knit-to-shape, in the United States, from yarns wholly formed in the United States, or both (including fabrics not formed from yarns, if such fabrics are classifiable under heading 5602 or 5603 of chapter 56 and are wholly formed and cut in the United States). Articles otherwise eligible to enter under this heading, and which satisfy the conditions set forth in U.S. note 3 to subchapter XIX of this chapter, shall not be ineligible to enter under this heading. Such countries shall be enumerated in this note whenever the USTR issues a Federal Register notice as described herein. Articles covered by the provisions of this note shall be eligible to enter the customs territory of the United States free of quantitative limitations. The USTR has determined that the following countries have adopted an effective visa system and related procedures and have satisfied the customs requirements of the AGOA and, therefore, are to be afforded the tariff treatment provided for in this note:

Benin, Botswana, Burkina Faso, Cameroon, Cape Verde, Chad, Ethiopia, The Gambia, Ghana, Kenya, Lesotho, Republic of Liberia, Madagascar, Malawi, Mali, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, South Africa, Swaziland, Tanzania, Uganda, Zambia

(b) (i) For purposes of heading 9802.00.80, duty-free treatment shall be accorded to the following articles imported directly from a beneficiary United States-Caribbean Basin Trade Partnership Act (CBTPA) country previously designated by the President in a proclamation issued pursuant to such Act and enumerated in general note 17(a) to the tariff schedule--

(A) apparel articles sewn or otherwise assembled in one or more such beneficiary countries from fabrics wholly formed and cut, or from components knit-to-shape, in the United States, from yarns wholly formed in the United States, or both (including fabrics not formed from yarns, if such fabrics are classifiable under heading 5602 or 5603 of chapter 56 and are wholly formed and cut in the United States) provided they otherwise comply with the provisions of this note; or

(B) textile luggage assembled in a designated beneficiary country from fabric wholly formed and cut in the United States, from yarns wholly formed in the United States.

Articles otherwise eligible to enter under this heading, and which satisfy the conditions set forth in U.S. note 3 to subchapter XX of this chapter, shall not be ineligible to enter under this heading. Articles covered by the terms of this note shall be admitted into the customs territory of the United States free of quantitative limitations. Apparel articles entered on or after September 1, 2002, that are assembled in a beneficiary CBTPA country from knitted or crocheted fabrics or from woven fabrics shall be eligible to receive the duty treatment provided for in this note only if all dyeing, printing and finishing of such fabrics from which the articles are assembled is carried out in the United States. The following countries have been determined by the USTR to have satisfied the customs requirements of the CBTPA and, therefore, to be afforded the tariff treatment provided for in this note:

Barbados, Belize, Guyana, Haiti, Jamaica, Saint Lucia, Trinidad and Tobago

(ii) Articles that undergo production in a CBTPA beneficiary country and a former CBTPA beneficiary country.

(A) For purposes of determining the eligibility of an article for preferential treatment under this subdivision, references to--

(1) a “CBTPA beneficiary country” shall be considered to include any former CBPTA beneficiary country, and

(2) “CBTPA beneficiary countries” shall be considered to include former CBTPA beneficiary countries,

if the article, or a good used in the production of the article, undergoes production in a CBPTA beneficiary country.

(B) An article that is eligible for preferential treatment under subdivision (ii)(A) of this note shall not be ineligible for such treatment because the article is imported directly from a former CBTPA beneficiary country.

U.S. Notes (con.)

(C) Notwithstanding subdivisions (e)(ii)(A) and (e)(ii)(B), an article that is a good of a former CBTPA beneficiary country for purposes of section 304 of the Tariff Act of 1930 (19 U.S.C. 1304) or section 334 of the Uruguay Round Agreements Act (19 U.S.C. 3592), as the case may be, shall not be eligible for preferential treatment under this note."

(D) (1) The term "former CBTPA beneficiary country" means a country that ceases to be designated as a CBTPA beneficiary country under this note because the country has become a party to a free trade agreement with the United States.

(2) For the purposes of this subdivision, the following countries are former CBTPA beneficiary countries:

El Salvador
Guatemala
Honduras
Nicaragua
Dominican Republic

If, with a view to a transfer (other than a transfer permitted by the second sentence) or the use for commercial purposes of an instrument or apparatus, a repair component admitted under subheading 9810.00.65 has been assembled into such instrument or apparatus, such component shall, for purposes of the preceding sentence, be treated as a separate article.

but the term does not include materials or supplies, nor does it include ordinary equipment for use in building construction or maintenance or for use in supporting activities of the institution such as its administrative offices or its eating or religious facilities. The term "instruments and apparatus" under subheading 9810.00.60 includes separable components of an instrument or apparatus listed in this subdivision that are imported for assembly in the United States in such instrument or apparatus where the instrument or apparatus, due to its size, cannot be feasibly imported in its assembled state.

(b) An institution desiring to enter an article under subheading 9810.00.60 shall make application therefor to the Secretary of the Treasury including therein (in addition to such other information as may be prescribed by regulation) a description of the article, the purposes for which the instrument or apparatus is intended to be used, the basis for the institution's belief that no instrument or apparatus of equivalent scientific value for such purposes is being manufactured in the United States, and a statement that either the institution has already placed a bona fide order for the instrument or apparatus or has a firm intention, in the event of favorable action on its application, to place such an order on or before the final day specified in paragraph (d) of this U.S. note for the placing of an order. If the application is made in accordance with the applicable regulations, the Secretary of the Treasury shall promptly forward copies thereof to the Secretary of Commerce and to the Secretary of Health and Human Services. If, at any time while its application is under consideration by the Secretary of Commerce or by the Court of Appeals for the Federal Circuit on appeal from a finding by him, an institution cancels an order for the instrument or apparatus to which its application relates or ceases to have a firm intention to order such instrument or apparatus, it shall promptly so notify the Secretary of Commerce or such Court, as the case may be.

(c) Upon receipt of the application, the Secretary of Commerce shall, by publication in the Federal Register, afford interested persons and other Government agencies reasonable opportunity to present their views with respect to the question whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. After considering any views presented pursuant to this paragraph, including any written advice from the Secretary of Health and Human Services, the Secretary of Commerce shall determine whether an instrument or apparatus of equivalent scientific value to such article, for the purposes for which the instrument or apparatus is intended to be used, is being manufactured in the United States. Each finding by the Secretary of Commerce under this paragraph shall be promptly reported to the Secretary of the Treasury and to the applicant institution. Each such finding shall be published in the Federal Register, with a statement of the reasons therefor, on or before the ninetieth day following the date on which the application was made to the Secretary of the Treasury in accordance with applicable regulations.

(d) (i) If the Secretary of Commerce determines under this U.S. note that an instrument or apparatus is being manufactured in the United States that is of equivalent scientific value to a foreign-origin instrument or apparatus for which application is made (but which, due to its size, cannot be feasibly imported in its assembled state), the Secretary shall report the findings to the Secretary of the Treasury and to the applicant institution, and all components of such foreign-origin instrument or apparatus shall remain dutiable.

(ii) If the Secretary of Commerce determines that the instrument or apparatus for which application is made is not being manufactured in the United States, the Secretary is authorized to determine further whether any component of such instrument or apparatus of a type that may be purchased, obtained, or imported separately is being manufactured in the United States and shall report the findings to the Secretary of the Treasury and to the applicant institution, and any component found to be domestically available shall remain dutiable.

(iii) Any decision by the Secretary of the Treasury which allows for duty-free entry of a component of an instrument or apparatus which, due to its size cannot be feasibly imported in its assembled state, shall be effective for a specified maximum period, to be determined in consultation with the Secretary of Commerce, taking into account both the scientific needs of the importing institution and the potential for development of comparable domestic manufacturing capacity.

(e) Subheading 9810.00.60 shall not apply with respect to any instrument or apparatus unless a bona fide order therefor has been placed, by the institution making the application under this U.S. note, on or before the sixtieth day following the day on which a finding of the Secretary of Commerce favorable to the institution has become final and conclusive.

U.S. Notes (con.)

(f) Within 20 days after the publication in the Federal Register of a finding by the Secretary of Commerce under paragraph (c) of this U.S. note, an appeal may be taken from said finding only upon a question or questions of law and only to the United States Court of Appeals for the Federal Circuit:

(i) by the institution which made the application under paragraph (b) of this U.S. note;

(ii) by a person who, in the proceeding which led to such finding, represented to the Secretary of Commerce in writing that he manufactures in the United States an instrument or apparatus of equivalent scientific value for the purposes for which the article to which the application relates is intended to be used,

(iii) by the importer thereof, if the article to which the application relates has been entered at the time the appeal is taken, or

(iv) by an agent of any of the foregoing.

Any appeal under this paragraph shall receive a preference over all other matters before the Court and shall be heard and determined as expeditiously as the Court considers to be practicable. The judgement of the Court shall be final.

(g) The Secretary of the Treasury and the Secretary of Commerce may prescribe joint regulations to carry out their functions under this note.

(ii) All articles and valuable wastes resulting from such processing will be exported or destroyed under customs supervision within the bonded period; except that in lieu of the exportation or destruction of valuable wastes, duties may be tendered on such wastes at rates of duties in effect for such wastes at the time of importation.

The following countries have been designated by the President as ATPDEA beneficiary countries that satisfy the customs requirements of the ATPDEA and, therefore, are to be afforded the tariff treatment provided for in this subchapter:

   Such tuna shall enter the United States free of any quantitative restrictions.

   (b) The term “United States vessels” includes any vessel having a certificate of documentation with a fishery endorsement under chapter 121 of title 46, United States Code; and the term “ATPDEA beneficiary country vessels” includes any vessel–

   (i) which is registered or recorded in an ATPDEA beneficiary country enumerated in note 1 to this subchapter,

22. For a textile or apparel good provided for in chapters 61 through 63 of the tariff schedule that is not an originating good under general note 29 and for which the duty treatment set forth in heading 9822.05.10 is claimed, the rate of duty set forth in the general subcolumn of rate of duty column 1 shall apply only on the value of the assembled good minus the value of fabrics formed in the United States, components knit-to-shape in the United States and any other materials of U.S. origin used in the production of such a good, provided that the good is sewn or otherwise assembled in the territory of a party to the Agreement (other than the United States) specified in general note 29(a) with thread wholly formed in the United States, from fabrics wholly formed in the United States and cut in one or more parties to the Agreement (other than the United States) as defined in general note 29(a) or from components knit-to-shape in the United States, or both. For purposes of this note--

    (a) a fabric is wholly formed in the United States if all the production processes and finishing operations, starting with the weaving, knitting, needling, tufting, felting, entangling or other process, and ending with a fabric ready for cutting or assembly without further processing, took place in the United States; and

    (b) a thread is wholly formed in the United States if all the production processes, starting with the extrusion of filaments, strips, film or sheet, and including slitting a film or sheet into strip, or the spinning of all fibers into thread, or both, and ending with thread, took place in the United States.

For purposes of determining which country-specific tariff-rate quota applies to such a good, the nonpreferential rules of origin used in the normal course of trade shall be applied.

For purposes of determining the quantity of SMEs under this note, the conversion factors listed in "Correlation: U.S. Textile and Apparel Industry Category System with the Harmonized Tariff Schedule fo the United States of America, 2008, or its successor publications, of the United States Department of Commerce shall apply.
